

GRADE 9 TECHNOLOGICAL EDUCATION Exploring Technologies TIJ 10

Technological Education has changed dramatically over the years, and has become a highly valuable component of a complete high school education. This introductory elective course allows students to explore the vital and necessary skills required in today's changing world. Students will experience and develop technological knowledge and skills introduced in the elementary science & technology program. Students will use a variety of tools, equipment, and software commonly used in industry. Students will begin to explore secondary, postsecondary education, and training pathways leading to careers in technology-related fields. Saltfleet's grade 9 Tech program is fun and activity-based, allowing students to learn basic skills through a series of practical activities and projects, with an emphasis on safety and problem-solving. The students will be exposed to the different Technology programs currently offered at Saltfleet in grades 10 - 12:

Tech Ed "It's your Future"

Communications Technology
Computer Information
Computer Engineering
Construction Technology SHSM
Green Industries (Horticulture) SHSM
Technological Design (AutoCAD)
Transportation Technology
