Background:

Grants for day school operations are based on two enrolment count dates: October 31 and March 31. Consequently a report is prepared for the Board of Trustees regarding each of these dates. Attached is the October 31, 2006 Enrolment Summary Report.

Rationale/Benefits:

The population of school-aged children in the Province of Ontario has been declining in recent years. A September 2001 study completed by OPSBA projects a steady decline in enrolment through to the end of the decade. Declining elementary enrolment is the result of children of the ‘baby boom’ moving from elementary school age to secondary school age. However, growth in secondary school enrolment will not offset the elementary school enrolment loss. The study also looked at estimated population growth of compulsory school aged persons (i.e. age 4 to 19) by region and concluded that only school boards in the GTA region will continue to have positive growth.

Experience across the province has so far proved out the general conclusions of the OPSBA study. Elementary enrolment was at its peak in 2002/2003 and has been in decline ever since. Since 2001/2002 enrolment has decreased by about 94,000, excluding growth boards in the GTA. Enrolment is expected to decrease by a further 14,000 in 2007/2008, bringing the cumulative reduction to 108,000 students or 7%. This cumulative decline is most significant in the elementary panel, which shows a decline of about 99,000 or about 10% of the 2001/2002 enrolment.

Enrolment patterns for HWDSB are consistent with provincial trends. In addition, the majority of boards in area are also experiencing declining enrolment. Attached are the following appendices:
