Parents are encouraged to monitor Internet/MSN use.

While the Internet is demonstrating an increasingly wonderful potential for supporting student learning (the new Google/Amazon offering of thousands of searchable books on line is one example), it also has an increasingly dangerous dark side. Unmonitored use of MSN (print messaging) can cause challenging situations. For example, a threat whether delivered face to face, by phone or over the Internet could lead to retaliation in the community or even police involvement.

The "draft" school year calendar for the school year 2006-2007 is posted on the HWDSB website <http://www.hwdsb.on.ca/calendar> from Feb. 17 to Feb.27/06
Please review the calendar and indicate yes or no as to your support.
