

Together

(Music and Lyrics by Jim Witter)

I used to think that I had it made
I was used to doing things my own way
Never needed anyone or anything
Then you came along

I was happy being all alone
I covered lots of ground on my own
But something was missing, that I have to say
You showed me the way

*Together...we can do anything together
You here with me is just better...better in every way
Together...we can do anything together
It's plain to see
If I lean on you, and you lean on me we can do anything*

It's funny how you seem to understand
Exactly where and when I need a hand
All I need to do is think of you
And there you are

There's a connection, that I can't deny
A special bond between you and I
You make it easy, we're a perfect fit

Alone I can dream it, but with you I can reach it

*Together...we can do anything together
You here with me is just better...better in every way
Together...learning and growing together
It's plain to see
If I lean on you, and you lean on me we can do anything*

And when the road is winding
And if the sky turns grey
I'll be your guide
I'll lead the way
(Breakdown)

Together...we can do anything together
You here with me is just better...better in every way
Together...we can do anything together
It's plain to see
If I lean on you, and you lean on me we can do anything
If I lean on you, and you lean on me we can do anything
