

Help Us Improve the **Learning Math Together** Resources.

In spring 2018, HWDSB held focus groups at three schools to hear directly from parents about the barriers they face when helping their children with Math.

In response to the feedback we received, we created the Learning Math Together resources. These resources can be found at www.hwdsb.on.ca/mathhelp.

We would now like to hear from you again to assess how well we met your needs and if you feel more confident in helping your child with their Math work.

Please fill out a short survey to let us know what you think of the resources and how they can be improved.

The survey can be found at
