#### Graduation Protocols :

- When posing the students at no time will the photographers touch the children and appropriate social distancing of 2 meters will be implemented at all times
- Each photography staff member is supplied cleaning tools (sanitizing wipes, hand sanitizer, sanitizing spray, and alcohol wipes) to ensure the photography location and camera locations are sanitized and safe for students and staff throughout the day

We've discontinued the use camera posing aids / props - including roses

- One critical change will be how we handle student data this year – in the past students were distributed data cards upon entry to the photography area that they then had to hand over to the photographer to identify them. We are pleased to go paperless this year with all of the student's information in the computer in advance to have a more efficient and safer picture day.
- Each photography staff member is provided with a daily cleaning checklist of items to be sanitized at the beginning, during, and at the end of each day.
- The use of PPE (personal protective equipment) is mandatory for all photography team members. Photographers will wear a facemask at all times while in your school and also practice social distancing while wearing the mask. Photographers are supplied with both cloth masks for daily use as well as a supply of disposable masks with their photography kits
- The Graduate will be responsible for putting on, adjusting and removing both the gown and sash during their session. Each Student will have their own gown and sash.
