

Asclepias incarnata 'Ice Ballet'

Advantages

-  Bee Friendly
-  Attract Butterflies
-  Attract Hummingbirds
-  Attract Birds
-  Deer Resistant
-  Native
-  Fragrant Flower / Foliage
-  Rabbit Resistant

Light Requirements

-  Full Sun

Mature Height

36-42" tall , 24-30" wide

Bloom Time

Mid to late summer

SKU

AM016153

'Ice Ballet' Swamp Milkweed is a staple of the butterfly garden, providing essential food, nectar and shelter to Monarchs at every life stage. Clouds of fragrant, bright-white blooms also attract and support a crowd of other pollinators. While many Swamp Milkweeds make their homes in wetlands, 'Ice Ballet' thrives in drier soils.

Please support our Monarch population by growing this vital food source for the monarch caterpillar!
