

GRADE 9 TECHNOLOGICAL EDUCATION

Exploring Technologies TIJ 10

Technological Education has changed dramatically over the years, and has become a highly valuable component of a complete high school education. This introductory course allows students to explore the vital and necessary skills required in today's changing world. Students will experience and develop technological knowledge and skills introduced in the elementary science and technology program. Students will use a variety of tools, equipment, and software commonly used in industry. Students will begin to explore secondary, postsecondary education, and training pathways leading to careers in technology-related fields. Ancaster's grade 9 Tech program is fun and activity-based, allowing students to learn basic skills through a series of practical activities and projects, with an emphasis on safety and problem-solving. The students will be exposed to the different Technology programs currently offered at Ancaster High in grades 10 - 12:

Communications Technology
Construction Technology
Manufacturing (Welding) Technology
Technological Design (AutoCAD)
Transportation Technology.

Please contact Mr. P. Wilson (Tech Dept. Head) if you would like information regarding Technological Education at Ancaster High School. Tel: 905 648-4468 Ex 323 Email: paul.wilson@hwsb.on.ca

**TECHNOLOGICAL EDUCATION:
DON'T LEAVE SCHOOL WITHOUT IT!**
