

STEAM ENGINE

Afterschool Program

Innovative

Experiential

Skill Focused

Progressive

About

STEAM Engine is a weekly afterschool program offered in selected schools in the Hamilton and Burlington areas. At STEAM Engine, we kick start students' interest and passion for STEAM through hands on projects, putting them on a fast track to developing STEAM related skills in a fun and engaging environment. Our curriculum is skill focused: through multidisciplinary projects, our students learn technical skills such as how to code, perform computer aided design (CAD), 3D print, work with electronics, design control systems, and build overall knowledge in STEM subjects.
