

## Virtual Lessons in the Comfort of Your Home!

### Join us in this fun virtual way of drawing.

We use the same format we have been using for our after-school classes. A format the students know and love.

**Grade 1-3 classes.** With 30 years of experience, our curriculum supports students of all abilities, including those that never considered themselves to be artistic. Our one-hour classes are both creative and fun. Art Innovators provides a safe vehicle for your child to express themselves creatively.

### Every week is a different drawing.

There are no repeat projects. Art supplies will be suggested for each project, but any art supplies you have at home will work. At Art Innovators we encourage creativity, individuality, and fun.
