

"The things I look forward to in life are my family, I have two sons, age six and eight and I have a daughter who is four but if you ask her she'll tell you she's 'four and a half', my sons are a little harsh on her but it makes her feisty. I also look forward to being out in nature, I feel a connection with nature whether I'm hiking, walking, biking or running. I love all of the seasons and could never live somewhere where the weather is the same all year round, I love that there's always surprises but at the same time you know what to expect." -Mrs.Duncan
