

## Registration Information

**Policies:** By registering your child, you acknowledge that you have read and agree to the policies found on our website.

**Reminder:** Announcements will be made at the beginning of each class to remind all registered children to attend the Mad Science program. We suggest to write a reminder in your child's daily planner to let their classroom teacher know your child is registered and should be attending.

**Program Cost:** **\$88 + HST**— Register before Thursday April 25, 2019 and receive \$10.00 off

**Payment Information:** All Major Credit Cards Accepted. Please call/email the Mad Science office if you prefer a different method of payment.

**Questions:** Please direct all questions to the Mad Science office rather than your school office.

**Behaviour Expectations:** We are committed to offering a quality program for every child registered in Crayola. Your child should be able to interact safely and appropriately with the Presenter, the other children in the class, and the equipment in both group and individual activities. While we make every effort to assist each child in having a great experience, children who display behaviour not within these guidelines may be withdrawn.

**Program Details:** This fun, safe and interactive course is suitable for grade 1-6 students. Your children will be working with our professional, trained Presenters. Each class is filled with dynamic demonstrations, tons of hands-on activities and weekly take-homes! If the program is happening during lunch or nutrition break, your child will eat during the first part of class.

Mad Science of Hamilton & Kitchener

Madsciencehk

### The 8 Awesome Topics For This Session Are:

**Elephants** - Let's get inspired by elephants, the largest land mammals on Earth! We will learn techniques to paint a sunset background, and layer on dark silhouettes of elephants and trees.

**Frogs** - Frogs come in many colors and patterns. Some are bold and some are camouflaged. Let's find out more about these amphibians, and use a special technique to paint speckled, watercolor frogs.

**Jellyfish** - Jellyfish dance and drift through the water, and are found in every ocean on Earth! But what exactly are they? Let's dive in and learn about these mysterious creatures of the deep. We'll create colorful, mixed media hanging jellyfishes using a special ink diffusion technique.

**Lions** - Lions are majestic animals, and fearsome predators. It's no wonder a group of them is called a "pride"! Let's learn how to create our own lion sculptures, and design savannah habitat dioramas for them to live in.

**Polar Bears** - Polar bears are amazing animals that face many threats to their survival. Let's imagine what life is like for them in the Arctic. We'll sculpt our polar bears on an ice floe using clay. Then we'll mix paints and mixing mediums to create the effects of fur and ice.

**Sharks and Fishes** - The streamlined shapes of sharks and fishes are perfect for living in the water. We can use simple shapes to draw sharks and fishes in a coral reef. Then we will add watercolor paint to create a colorful scene under the sea.

**Snakes** - Snakes are fascinating and often misunderstood reptiles. Their skin has a unique texture, and they come in a wide range of patterns and colors. Let's design our own three-dimensional, patterned snakes to take home.

**Turtles and Tortoises** - From sleek sea turtles to sturdy, land-based tortoises, turtles come in many shapes and sizes, and can be found in many different habitats. We'll start by sculpting a coil to make the shell, and we'll add extra pieces and colors to make our own turtle sculptures.
