

How well can your child see?

Last month, vision screening was completed at your child's school for all Kindergarten Year 2 (Senior Kindergarten) students. Healthy vision is important for your child to play and learn. It is recommended that all children see an optometrist for a comprehensive eye exam yearly. This service is free with an OHIP card for children ages 0-19 years.

If you received a letter indicating there may be an issue with your child's vision, please book an appointment with an optometrist for a comprehensive eye exam.

If you need help finding an optometrist for your child, please contact Hamilton Public Health at 905.546.2424 ext. 5369
