

It began on Earth Day 1989.

To enjoy our space to the fullest, we needed a place for shelter, for active play and for small groups to get together.

Millgrove School **GO** for **Green**

The students developed a plan that changed their playground from "what it was" to "what it could be".

"Go for Green Day" was initiated and people arrived with shovels and other equipment to tidy, fix and build on the Learning Grounds.

A strong parent group formed to fundraise and eventually purchase equipment chosen by the students.

Every October and May the Millgrove School community - parents, staff, students, former teachers and alumni, members of the local horticultural club, and community volunteers - all come together to develop and care for our playground.

Thanks to Go for Green our playground is an extension of the classrooms, providing engaging, hands-on learning at its best.

A few Go for Green Accomplishments

Carolinian ecological restoration, a Learning Garden, a Peace Garden, Vegetable Gardens, Kindergarten Gardens, playground structures, a small hill, a sand play area, Kings Court, Hopscotch, Shade Trees, Butterfly and Perennial Gardens

Our hope is Millgrove students take this learning beyond our tiny community to be good citizens of Earth wherever their adventures take them.

Rooted in tradition
