Math & Autism Meet Up

Autism Awareness
and
Acceptance

Use your math skills to solve this Autism Awareness Activity.

Can you estimate how many blue candies are in each jar?

Choose the jar(s) of candy you would like to win,
pay 25c and make a guess of how many might be in it.
The student who guesses the correct amount will win the jar.
Draws will be done on April 28th after our Autism Walk.

All money raised will be donated to the Autism Program
at McMaster Children's Hospital.

Parents, feel free to send in a donation to support this cause.
