

This **Thursday, June 9th, from 11am - 2pm**, Rousseau School is holding it's first Science Fair! Students have been diligently working on their projects as an extra curricular activity for months now and are ready and eager to demonstrate all of their Scientific knowledge! We welcome 11 scientists from McMaster University to act as judges for this event, under the leadership of Dr. Gregory Steinberg. We would like to invite parents at any point between these times to walk through the fair and speak to all of our young scientists. Hope to see you there!
