3d printer for use with manufacturing and technological design SHSM

Dimension uPrint Personal 3D Printers

Now There's Room On Your Desk And In Your Budget For A 3D Printer — starting at only $14,900' USD

uPrint® Personal 3D Printers give you more flexibility than ever for making 3D models for visualization, collaboration, and functional testing.

uPrint is compact enough to fit on your desktop; simple enough for no-hassle setup and operation; and — best of all — affordable enough for most users, no matter your profession or office size.

No more long waits in the queue of a central 3D printer, or for models to arrive from an outside service bureau. uPrint lets you print whatever

Six board imaged Lenovo L512 to replace donated Pentium II in manufacturing lab to run new CNC software.

Some money must be spent on the physical lab, Painting, desks, stools, curtains as future shop stipulated when won so an adjustment must be made for this.
