School Dental Survey and Assessment

Dear Parent/Guardian:

City of Hamilton Public Health Services Community Dental Team will be at your child's school to carry out the Ontario Ministry of Health and Long Term Care (MOHLTC) *Oral Health Survey and Assessment Program (dental screening)* in selected grades. The screening will include all students in **Kindergarten year one and two, and grade 2**. Children in other grades who were previously identified with dental needs may be re-screened. Screening identifies children who may qualify for one or more public health dental programs. The oral health information collected is used in planning and delivering children's dental programs in the city and the province. This information is collected as required under the Health Promotion and Protection Act, Ontario Public Health Standards (2008).

To conduct the oral health screening, a Registered Dental Hygienist will use a light and a separate, sterilized mirror to look in the mouth of each child. We meet standards of infection control set out by the Royal College of Dental Surgeons of Ontario (RCDSO), and the MOHLTC. This dental screening does not replace an examination done in a private dental office, and your child should continue to have regular dental checkups.

We will notify you if your child needs treatment or is eligible for preventive services, including sealants, topical fluoride or scaling.

If you have any concerns or wish to withdraw your child from the dental screening, please send a note to the school with the child's name and grade.

If you have other children in the school, that are not included in the program, and you wish to have screened, please send a note to the school office.

Yours Sincerely,

City of Hamilton, Public Health Services
Community Dental Program
