

Fantastic FORCES

An 8-Week After-School Program for Students in Grade 1-6 held at:

Templemead Elementary School
Tuesdays beginning
January 27 - March 24
3:20pm-4:20pm

REGISTER BEFORE JANUARY 20TH
FOR OVER \$21 OFF!
PAYMENT PLANS AVAILABLE!

Kids explore a variety of introductory topics in engineering, physics, and chemistry as they learn how science can be applied in everyday life.

Each Week, Your Child Will:

- Cover a broad range of STEM topics with something for every child.
- Encourages hands-on learning, problem-solving, and critical thinking.
- Makes science exciting and accessible through real-world connections.
- Take-home tools and creations keep the fun going after class

Why You'll Love It:

- Kids get excited about science through fun, interactive experiments.
- Content supports what students are already learning in class.
- Our Mad Scientists keep students captivated from start to finish
- Students feel empowered to explore, ask questions, and discover!

What Kids Will Explore:

Energy Burst: Kinetic or potential? Find out which type of energy powers you, your world and lots of cool toys!

Life In the Sea: Put on your scuba gear for a dip in the deep! Find out which creatures inhabit our oceans and how they survive.

Fantastic Fliers: Build and test paper aircraft while learning what helps objects lift and soar.

“Fun”-damental Forces: Push, pull, balance, and spin. Kids discover how gravity and inertia impact motion.

Science of Magic: From disappearing tricks to optical illusions, kids learn the scientific secrets behind classic magic.

Super Structures: Stronger together! Kids design and test bridges, arches, and towers to learn the basics of architectural strength.

Under Pressure: Air matters! Kids discover how air pressure moves objects—and try out Bernoulli's principle.

Wacky Water: Kids test the unique properties of water, from density to surface tension
