

WELCOME TO THE NEW eID CARDS

eID cards for students are an eco-friendly, safe alternative to plastic ID cards in a post-COVID world. They're easy to use, too! Simply sign in online and add the digital ID card to the digital wallet on your smartphone.

CYBER-SECURE

We've taken care to make sure the student data attached to the eID cards is stored securely, ensuring our protocols meet or exceed PIPEDA, FIPPA, and CASL requirements. All personal data is fully encrypted and stored on Edge-managed systems, located at an Edge-owned facility.

USE IT FOR ANYTHING

Your school's eID card is so convenient because it can be used for anything a plastic ID card would be: identification purposes, cafeteria meal cards, and more. Plus, it's dynamic, so any updates you make in your Edgeview portal will reflect immediately in the eID data.

ECO-FRIENDLY

Going digital removes the need for printing, helping to lower our carbon footprint and reducing the amount of plastic waste being produced each year. Digital also means it's impossible for the cards to get lost!

DON'T JUST TAKE OUR WORD FOR IT...

"From a school administration point of view, we have found the electronic eID cards to be fantastic! In the past students would forget their student cards and not be able to use the cafeteria. They would come to the office asking for new cards, money or a note to allow them to verbally give their student number to the cafeteria. This was a very insecure system for food purchases. Now we simply ask them to add the card to their wallet on their phone and they are never without it. We used to have to order new student cards and now there really is no reason to even have a hardcopy student card."

- Sharon Van Beilen, Administrative Assistant & Rental Coordinator at King's Christian Collegiate
