Apprenticeship

What is an apprenticeship?

- Learn a skilled trade on the job.
- Work with and learn from experienced workers – and get paid while you do it.
- You also learn in a classroom from instructors who know the skilled trade. This may take place in high school, on a college campus or a union training centre.
- Canada has a large demand for workers in the skilled trades and technologies. There are 144 skilled trades in Ontario!

BE YOU. BE EXCELLENT.

Comparing Pathways to Apprenticeship

Direct Entry to Apprenticeship

As an apprentice, you learn a skilled trade on the job in combination with class training

VS

Apprenticeships are completed in 3-5 years

VS

Pre-Apprenticeship College Program

The college courses may be 1 or 2 year programs. The courses are designed to deliver the skills enabling persons enter a skilled trade.

After completing a college program, the students begin the apprenticeship process.

Apprenticeships: How to get started

- Take courses in Technologies (or other areas leading to your chosen skilled trade) to develop skills that apply to skilled trades
- Take co-op courses to test out career pathways, gain real-world experience and form relationships with potential employers
- Leverage co-op experience and relationships to explore an apprenticeship opportunity OR apply to a college program where you will develop skills and be connected with an employer

BE YOU. BE EXCELLENT.

OYAP - Ontario Youth Apprenticeship Program

- Allows students to earn high school credits while participating in apprenticeship training in a skilled trade
- Full day co-op placement
- Semester 2 Accelerated OYAP opportunities available - see your Guidance counsellor if interested
- Signed apprentice = Paid employment + 4 credits + apprenticeship hours earned towards certification

BE YOU. BE EXCELLENT.
