Register

Overview:

Photography is a powerful tool for exploring the world inside and out. Join us as we explore the ways in which an iPad can be used to capture and communicate your unique perspective. In this hands on, three part series, we will:

- Explore how key principles of composition, lighting and colour can be used to create stunning photos
- Play with various forms of photography (portrait, landscape, time-lapse etc) and explore how an iOS device can be a powerful tool for capturing the world around you
- Share resources that will empower you to continue your learning journey beyond the session

Tools:

To support your participation in this session we would recommend that you have the following:

- access to reliable Internet for video conferencing
- iPad, iPhone or iPod touch running iOS 13 or later
