

## Annual Media Consent Agreement

Hamilton-Wentworth District School Board (HWDSB) is committed to protecting student personal information and helping to positively shape the “digital footprint” that students leave when they post personal information online. Please refer to your school’s website for our *Parent/Guardian Letter on Personal Information* for a full explanation and examples of how we routinely handle student information and protect privacy while meeting legislative requirements.

Classrooms have changed dramatically with the introduction of digital tools and since the Ministerial order to help stop the spread of COVID-19. Students may engage in blended learning, involving both physical and virtual classrooms. In keeping with 21st century learning priorities, the board provides students with access to Microsoft Teams, the HWDSB App Catalogue, email and a calendar, as well as the Ministry of Education Virtual Learning Environment or the “HUB”. Online learning environments include synchronous learning where all participants must be online at the same time, and asynchronous learning where the content is available for students to access when they choose. In addition, students may use online tools or web apps and social media as deemed appropriate by the classroom teacher.

Students receive age appropriate instruction on digital citizenship and the safe use of technology. For more information on our policies and directives governing 21<sup>st</sup> century learning, see *Policy 6.1 21st Century Learning*, along with the *Responsible Use Procedure, Ownership and Authorship Procedure*, and the *Identity, Credibility and Positive Participation Procedure*. These policies and directives are easily found by using the search function on the board website ([www.hwdsb.on.ca](http://www.hwdsb.on.ca)).

Students at HWDSB will use the internet at school and will learn how to make use of the tools that we provide in order to learn, create, share, and collaborate. They will participate in online spaces that are visible within the classroom, and possibly within the school and other sites across the board. Only with your consent on this form will online contributions that are public (i.e., visible *outside* of HWDSB) contain identifying information.

**We are asking for your consent to allow your child to fully participate online in ways deemed age appropriate by classroom teachers and directly related to their learning and accomplishments. Your consent is completely optional. With consent, photos/video/audio recordings of your child, their written and creative work, and/or name may appear online beyond HWDSB schools, (i.e., publicly visible to the community or discoverable on the World Wide Web) involving, for example:**

- school electronic newsletters sent to our parent community
- classroom websites, blogs, and video projects
- classroom/school/board social media accounts (e.g., Twitter, YouTube, etc.)
- school/community media publications or broadcasts
- other educational platforms

## Consent to disclose electronic student information

**Yes, I agree** and give my permission for the disclosure of my child's personal information in the forms described (e.g., photos/video/audio recordings of my child, name, written/creative work, social media/website/news media posts) as they participate in a 21<sup>st</sup> century learning environment under the guidance of their classroom teacher, and for sharing and celebrating their creative and academic accomplishments by school/board staff and local news media. I understand that once posted online, the student information may appear in other publications outside of HWDSB's control.

**NO, I do not agree.** I do not consent to the disclosure of my child's identifiable personal information in ways that are publicly visible and/or searchable on the World Wide Web.

Your child's classroom teacher will keep you informed throughout the year about the 21<sup>st</sup> century learning experiences planned for students so that you have opportunities to ask questions about specific technologies and to change your consent if desired.

If you have any concerns related to the safety of your child with respect to use of personal information, please speak with your teacher or school principal where your child attends.
