Child self-isolates at home and contacts health care provider for advice/assessment. Asymptomatic household contacts &/or close contacts can continue to attend school/work and monitor for symptoms.

Child becomes ill at home with two or more of the following new or worsening symptoms: sore throat, stuffy nose &/or runny nose, headache, nausea, vomiting &/or diarrhea, fatigue, lethargy, muscle aches, malaise.

Child tested for COVID-19?

- **Yes**
  - Child with positive test result remains in isolation and follows Hamilton Public Health Services guidance. Child cannot attend school/child care for at least 10 days. Household contacts need to self-isolate at home and follow public health guidelines.
  - If child has no known high-risk exposure and has not been advised by public health to isolate: Child can return to school/child care when they do not have a fever (without the use of fever-reducing meds) and when symptoms have been improving for 24 hours.

- **No**
  - Child has alternative diagnosis provided by health care provider.

  - Child with symptoms needs to isolate at home until without symptoms for 24 hours.

  - Child with symptoms self-isolates at home. Household contacts should monitor for symptoms.

  - Test result received.

  - Child stays home for a minimum of 24 hours from symptom onset. If symptom is improving, child returns to school/child care if they feel well enough to do so. If symptom worsens/persists, contact health care provider.
