

McMaster SynBio presents

High School Internship

Apps. due

May 30

@11:59PM

What is Synthetic Biology?

Biotechnology | Metabolic Engineering | Bioengineering

The engineering of biological systems. The design or redesign of organisms for useful purposes. Making medicine, sustainable materials, biologic computers.

Who Should Apply?

- ✓ Curious about science?
- ✓ Free this summer?
- ✓ Considering university?
- ✓ Wondering about jobs in science?

Participants are expected to commit approximately **9 hours per week**, combining synchronous (live) and asynchronous (independent) sessions.

This program **may not be ideal** for students only seeking paid roles or strictly pursuing medical/dental school.

Week 1

University Life &
Team Formation

Week 2

Modelling
Workshops

Week 3

Laboratory
Workshops

Week 4

SciComm &
Symposium Prep
