Meeting with Professor to explore study & career pathways

<https://therisc.ca/real/>

Camp Overview

- ▶ Working in teams with teenagers with similar interests at a top university campus.
- ▶ Building climate risk knowledge, leadership and decision-making abilities under the guidance of academic experts.
- ▶ Gaining key skills that will be valuable for college applications and help explore unique career options.
- ▶ Exploring climate risk in a fun, hands-on way through Virtual Reality (VR), games, simulations and group activities.

Why Climate Risk?

The next generation will inherit a world shaped by climate-driven challenges and opportunities. Students who understand climate risk gain a critical advantage: they learn to analyze complex information, anticipate future impacts, and make sound decisions in an uncertain landscape. These are skills that universities value and employers increasingly expect. This is not just about awareness - it is about preparing the youth to lead, adapt, and excel in the fields of tomorrow.

This program is proudly supported by:

Natural Sciences and Engineering Research Council of Canada

Conseil de recherches en sciences naturelles et en génie du Canada

Canada

This camp is co-offered by:
