### 1.1 Executive Summary/Owner's Statement of Requirements

The development of new performance based Design Guidelines for transforming Hamilton Wentworth District School Board's elementary schools is both a timely and critical challenge. Many of HWDSB's aging schools require upgrades and costly repairs to meet curricular demands and day-to-day operations. Added to these significant financial and scheduling challenges are other critical and emerging issues of new curriculum and program delivery strategies, which need to be physically accommodated and resolved in each HWDSB school. These include: student engagement, wellness, universal design (accessibility); special education delivery for personalized learning; sustainability; and the integration of, and possibilities for, technological change to teaching and learning strategies. This guideline informs both new construction and renovations to existing schools.

The Board's elementary schools require change just to keep pace, let alone be exemplars of supportive environments for enhanced student achievement. The objective is to create exemplary learning environments that meet current and future student needs.

The purpose of the Architectural Design Guideline is two-fold: to create a framework and set of guiding principles to enable all of HWDSB's facilities, both new and existing, to better support new trends in educational delivery and enhance opportunities for student success; and to provide a guideline for the Board's new and improved school facilities to ensure that program strategies can meet the needs of all students in the 21st Century including providing students with safe, inclusive, innovative and engaging school environments.

The new elementary school design guideline aligns with key educational principles and values envisioned by the Board. The design guidelines respond to the current and future needs, unanticipated changes in pedagogy, curriculum, technology and learning expectations. The guideline accommodates a robust enough framework to adapt to specific programming requirements, the community needs and diverse existing site issues. School construction will align with Provincial funding parameters. The design guideline includes input from the school community including educators, caretaking and maintenance personnel. The concepts illustrated in the guidelines will demonstrate that new forms of learning will require new spatial conditions alongside the traditional teacher fronted rooms.

Flexibility in curriculum delivery, based on personalized learning, supported by appropriate technologies and quality learning environments are the basis for the design of the new schools and the alterations to existing schools for HWDSB. The guidelines describe learner centered settings which range from specialized to multi-purpose, from formal to informal and from physical to virtual. All new learning spaces will have access to natural light. Renovated spaces will have access to natural light where possible. Wireless network access will be available on demand.

### 1.2 Purpose of the Document

This guideline is written as a performance based statement of requirements which focuses on the planned educational activities in order to achieve the desired results. This allows for design flexibility which is essential for these facilities since it is meant to apply to both new and existing schools.

Although not written as a prescriptive statement of requirements which is directed more by mandatory codes, standards and regulations, and existing building structural or heritage constraints, these guidelines take into account the Ministry funding formula and will conform to the Ontario Building Code requirements.

The purpose of this guideline is to provide a framework and specific guidelines for the design of the new elementary schools in the HWDSB and to assist in the planning and development of the additions and alterations for the existing elementary schools. The goal is to provide consistent, clear information for the school Board and the design professionals as a new generation of schools are being created for HWDSB. The Design Guidelines establish a uniform level of quality and sustainability for all elementary school buildings. They apply to new school facilities and additions/renovations to existing buildings. The challenge will be to balance between broadly applicable standards and a program delivery for a particular demographic. Further stakeholder, community and student consultation is required in the design and renovation of each school to ensure that the design address specific community needs. The school facility must be responsive to a school district's educational program and demand. The intent of the Design Guideline is to allow the Board to develop building programs and spaces that respond to each school community's unique needs and therefore, the design guidelines will adapt based on the specific and unique characteristics and requirements of each school community and the existing building potential.

### 1.3 Design Guideline Organization

The purpose of the Design Guideline is to provide the Board and the design professional with design parameters for various program spaces including spatial relationships of programs, program activities and environmental considerations. The design guideline is organized to include a description of all the programs offered by the HWDSB for elementary schools.

The program space summaries provided in the guideline include all the programs offered in the Board and summarize the space requirements for each program space. They will assist the design professional in the placement of programs in relation to each other and in the detailed design of the various spaces. The work sheets include the following information:

- Area: Square foot area given for the room is the necessary area. The area is given in net square feet/square meters and is defined as the area within the walls of the room. Area may differ in renovation projects to suit space available.
- Program Activities: Includes a description of the types of activities that would occur in this space for the specific program.
- Spatial Relationships: Outlines the required or desired adjacencies that the program would have to other programs or spaces.
- Environmental Considerations: Describes what specific environmental considerations the space will need to accommodate the specific program activities, i.e. lighting, HVAC, etc.
- Finishes: Outlines what finishes should be considered for the floor, walls, base and ceilings. The finishes stated for the spaces have been developed based on the function of the room.
- Furniture: Provides general information regarding the furnishings that may be accommodated in each space. This information is provided only for the purpose of assisting the consultant in the layout of each program area. Furniture selection and procurement are not part of this Guideline.
- Fixed Equipment: Describes the casework and equipment to be provided in each space to support the specific program requirements.
- Plumbing, Electrical, HVAC and Technology Systems Infrastructure: Items listed in these sections are elements that are specific to the program space that other regular classrooms may not have. For example, the Construction Technology classroom will have special electrical requirements for specialized machinery as well as special exhaust required for dust, etc.
- Diagrams: Diagrams of the space have been developed to show how some of the features and loose furnishings may be organized. The space is not required to be designed in the configuration shown but shown as an example to assist the design professional with how the space might be organized.
- Casework and visual display boards should reflect the needs of the specific school and its program. The intent of this list is not to mandate casework or visual display boards that may not be needed by a particular program, but rather to be used as a guideline for items that are generally used in this type of space.

### 1.4 The Planning Process

The HWDSB is responsible for defining the educational mission and vision for the Board’s elementary schools and creating learning environments that will meet the current and future needs of the students, parents, staff, teachers, administration and community members. The intent of this document is to take these findings and translate them into a guideline that will assist the design professional in designing the appropriate facilities to meet their needs.

### 1.5 Participants and Consultation

Through the process of information gathering, the Board’s educators and key stakeholders were engaged in a dialogue where they discussed their concerns, aspirations, and their vision for the school facilities through a series of visioning sessions and workshops. Visioning sessions/workshops were held with program/department leaders from various schools where they were permitted the freedom to express their ideas and concerns.

The following Planning Concepts describe a fundamental philosophical approach to the design of all spaces within an exemplary learning environment.

### 2.1 Welcoming Entry

- The main entry to the school will be familiar and friendly to students, staff, parents and the wider community and should invite and encourage them into the school.
- The main entry should be exciting, inclusive, welcoming and open, light, safe, well maintained and demonstrate the values of the school community.
- The entry will be located in direct view of the General Office to provide direct supervision of all visitors to the school.
- A Separate Quiet and secure entrance should be designed to accommodate students with specific needs.
- Provide space for display of student work.

### 2.2 Comfort

- Student learning is improved in a comfortable, environment promoting engagement and connections with the other students and teaching staff as a community.
- Spatial configurations, noise, heat, cold, light and air quality directly bear on students' and teachers' ability to perform. The incorporation of environmentally sustainable strategies enhances the quality of the physical environment.
- Comfort is essential to the wellbeing and success of students and teachers.
- Individual seating must take into account different body sizes and the periods of time learners need to occupy seating. Seating should be comfortable and ergonomically amenable.
- Varying types of movable and reconfigurable seating will provide comfort for varying types of learners and pedagogues.
- Responsive heating and ventilation and variable lighting that can be controlled in individual spaces will accommodate different teaching modalities and user needs.
- Students require controlled natural and task-appropriate lighting and interesting room shapes and configurations. Spaces with multiple and accessible light levels help to create interest and engages learners.

### 2.3 Flexible/Adaptable/Robust

- Students and teachers require a variety of instructional space sizes in order to allow for flexible teaching and learning arrangements. The school environment needs to respond to the varying ways students learn. Both large collaborative group spaces and individual small group spaces need to be accommodated to allow students and teachers the flexibility to adapt to different learning and teaching styles.
- Adaptability and flexibility are critical to effective learning environments, therefore, buildings must be planned to adapt to inevitable changes at minimum expense and little disruption of the educational process. Approaches to learning vary over time and from one staff member to another. A robust design will be able to accommodate flexibility and change comfortably with minimal disruption to the educational process.
- There are a number of strategies that can be employed, such as: providing individual, small group and larger group learning spaces; grouping together teaching areas that can benefit from multiple uses; classroom designs which allow for a variety of layouts; and careful planning of community use facilities that can be easily accessed and secured from other school areas.

### 2.4 Daylight and Views

- Natural daylight contributes positively to the development and growth of student accomplishment.
- Lighting, day lighting and natural ventilation controls should be available to occupants to customize the comfort of spaces dependent on the current activity.
- Every new learning space will have access to natural daylight, either directly or indirectly.
- Views to the exterior are essential to assist with way finding, passive security and allows for visual stimulation.
- Views will be provided from learning spaces and circulation spaces.

### 2.5 Transparency

- Designs need to allow for passive supervision by employing transparent materials including glass while incorporating appropriate features for lockdown.
- Rooms that open to each other and allow a connection between learning spaces of different types will support team teaching and interdisciplinary program cross overs.
- Design strategies that address visibility and transparency include:
  - learning clusters which are home to smaller student groups;
  - creating collaborative staff work areas at strategic points with views of circulation routes;
  - interior glazing to teaching areas;
  - open areas providing visibility from one floor to another;
  - and avoiding alcoves that can be used for intimidating activity.

### 2.6 Wellness

- The buildings physical environment will contribute to the wellbeing of its occupants.
- The ability to control the temperature, lighting and furniture will improve the overall comfort level and encourage students to learn and concentrate and allow teachers to carry out their daily activities comfortably.

### 2.7 Display Space and Artwork

- Student display cases should be prominently located throughout the school to allow students the opportunity to exhibit their work.
- Display space and artwork is not specifically addressed in the OBC but is discussed in the Ontario Fire Code (OFC) which references decorative materials installed in an exit serving an assembly occupancy with an occupant load of more than 100 persons. Although the intent was meant to address draperies and tapestries, some authorities may view this as applicable to artwork and student displays. The quantity and location of display spaces and artwork needs to be reviewed with the local Municipal Authorities.

### 2.8 Technology

- Collecting, analyzing, displaying and disseminating knowledge, typically involves technology.
- Technology is an integral part of our lives and for students it is central to their way of thinking and learning.
- Technology must be dispersed throughout the school and be available anytime, anywhere.
- Seamless integration of technology with wireless capability available everywhere and for everyone.
- Abundant outlets must be provided for charging of portable devices.
- Surfaces that can be projected upon and written upon to be located throughout the facility.

### 2.9 Safety and Security (CPTED)

- Lockdown is the restriction of movement during the time of a potentially serious violent incident that would endanger the lives of students and staff.
- The safety, security and physical well-being of students is the Board's highest priority. Great care needs to be employed in the ensuring physical safety, employing design and planning strategies which incorporate the fundamental principles embodied in Crime Prevention Through Environmental Design [CPTED] — natural surveillance (visibility); natural access control; and territoriality.
- Refer to the HWDSB Lockdown, Hold and Secure, Shelter in Place Directive

### 2.10 Sustainability

- Solar, rain harvesting, recycling, natural ventilation, day-lighting, edible gardens, and other sustainable strategies may be integrated into the facility and become part of the curriculum strategy.
- Energy efficient features shall be incorporated into school facilities design.
- Promoting the design and construction of green schools will make a significant impact on student health, teacher retention, school operating costs and the environment.
- Provide solutions that effectively minimize negative impacts on the environment.
- Design concepts need to address durability, impact on operating costs and ease of maintenance.
- Reduced site impacts and off-site impacts.
- Reduced energy and water consumption.
- Improve indoor environmental quality.
- Increase construction waste diversion and recycling, material re-use and recycled content, improved durability, longevity and maintainability.
- Reduce both long term and ongoing environmental load of a building.
- Demonstrate the sustainable features of the school as an interactive learning experience for the students and a model for the community.

### 2.11 Universal Accessibility

- Provide a very high standard for barrier-free accessibility, accomplished in a seamless manner, to ensure that universal access, for all students and staff of all abilities, is fully integrated throughout the facility.
- Municipal codes and laws are in place to ensure that full accessibility will be incorporated throughout all the facilities.
- The design and planning must be all encompassing, accommodating people of all ages and all levels of ability.

### 2.12 Indoor/Outdoor Physical and Visual Connectivity

- Provide interior and exterior views and vistas.
- Provide interior window partitions to encourage collaboration and provide supervision.

### 2.13 School/Community Connections

- Designing with a focus on community involves components of the building having a clear identity that distinguishes it as a memorable presence.
- The facility should also clearly address the convenient use of the building's facilities securely and independently as required by each user. All of these factors will promote a sense of ownership and community shared between the many diverse users.

### 2.14 Heritage

- Alterations, additions or replacement of existing school communities require sensitivity to the culture, history and heritage of the school as both a building and an institution
- Strategies may include concepts to preserve, reintegrate and reintroduce important historical elements of the old school into the new design
- Building systems upgrades, Ontario Building Code compliance and retrofits for universal accessibility must be accommodated

### 2.15 Operations/Maintenance

- The selection of building materials and equipment will be easily maintained and selected in conjunction with the buildings operations and maintenance staff.

### 2.16 Hardware

- Refer to HWDSB Lockdown hardware standards.

### 2.17 All Spaces will be Learning Spaces

- All spaces within the school will promote and encourage socialization, learning and collaboration. Providing a variety of interior and exterior spaces for gathering will allow for multiple learning opportunities.

### 3.1 Site Design Criteria

A school is an important community institution and the site must reflect this. School sites accommodate a variety of activities which must be accommodated in a safe and secure manner. School sites are a gathering space for people and should not appear car-centric.

Outdoor activity is a critical element in learning, enabling students to develop self-confidence, use their imaginations, learn self-discipline and compromise, improve motor skills, while improving their physical fitness. Site design, including passive and active commons for student gathering, can provide for casual interactions, outdoor eating areas, structured learning, sports and physical activities, and quiet individual spaces for reading or reflection.

Site selection applies to new construction. A review of the site selection criteria is required for additions to existing facilities to determine if the existing site can accommodate the site design requirements. Factors to be used in judging the merits of a site include aesthetic considerations, City of Hamilton Site Design Guidelines, local Policy, Codes and Zoning, easements/right-of-way, provincially mandated Green Schools Resource Guide standards, best-practice in environmentally sustainable design, pedestrian-oriented (or human-scaled) design standards, and safe access routes for all modes of transportation.

HWDSB has signed an ASST Charter (Active & Sustainable School Transportation) with the City of Hamilton which emphasizes the importance of walking, cycling and public transit. School site design should, where possible, comply with the principles of the Charter.

#### 3.1.1 Vehicular Access

- Bus loading area sized to meet the anticipated number of buses. (work with City for off-site bus drop-off/ bus lay-by)
- Schools with two frontages to locate bus lay-by at side of the school
- Locate the bus zone so that passengers do not need to cross any vehicular traffic.
- Locate the bus loading zone east of but not directly beside playgrounds, windows, and doors where students can be exposed to vehicle emissions.
- Separate student, bus, and staff vehicular traffic.

### 3.1.2 Parking

- Provide parking areas that are not only efficient, but safe, attractive, and environmentally responsible.
- Parking areas should be carefully designed to enhance the local urban design and environmental conditions, not detract or overwhelm them.
- Surface parking design should
  - Mitigate urban heat-island effect;
  - Manage stormwater runoff on-site;
  - Incorporate best-practice Low Impact Development techniques;
  - Create direct, legible, safe and comfortable pedestrian and bicycle routes;
  - Enhance the public realm.
- Provide no more than the minimum number of parking spaces as designated by the municipal by-laws and the Board's specific site requirements for staff, visitors, and students.
- Provide heavy duty paved surface in all fire route locations.
- Provide barrier free parking adjacent to the main entrance and so that people do not need to cross any vehicular traffic to enter the building.
- Anticipate the need for school expansion by way of future portables. With this in mind, provide flexible areas that may be converted into future parking as required..
- Where pedestrian and vehicular conflicts may arise, provide clear delineation by way of surface treatment variation, bollards, planting strips, or curbing whether flush, rolled or barrier.
- Locate curbs between pedestrian circulation and vehicular traffic.
- Provide landscaped islands and/or drainage swales to reduce heat island effect and mitigate stormwater runoff.
- Provide snow storage areas with appropriate site drainage.
- Reduce the number of driveway connections to the public street to strengthen streetscape and to minimize pedestrian-vehicle conflict points
- Locate driveways opposite existing or proposed driveways and streets to avoid offset intersections and traffic difficulties
- Provide a designated pathway through parking areas to building entrances for drivers
- Break-up large parking lots with landscaping to minimize the appearance of expansive impermeable surfaces
- Where walkways cross vehicular circulation routes, use alternative hard surface materials or raised crosswalks.
- Provide short-term parking spaces with anti-idling signage.

### 3.1.3 Service Vehicles Circulation

- Separate service vehicle circulation from other vehicular circulation, where possible.
- Provide direct access to the receiving, garbage/recycling, and loading areas.
- Meet the requirement of municipal by-laws.
- Provide heavy duty paved surfaces for access to loading, garbage and receiving areas.

### 3.1.4 Pedestrian Circulation

- Provide a clear, legible, and continuous pedestrian network throughout the site and parking areas.
- Provide minimum 2m AODA standard facility (multi-use path to separate active transportation circulation from vehicular traffic)
- All grade transitions are to be fully accessible, incorporating the City of Hamilton Urban Braille Standards.
- Clearly defined active transportation routes to be logically laid out and illuminated to allow students and visitors to navigate the entire site in a safe manner with convenient access to all doors around the perimeter of the building and parking area.
- Clearly define fully accessible routes to all areas of the school site through the application of the City of Hamilton's Urban Braille Standards.
- Link active transportation routes from building entrances to public sidewalks and bicycle network
- Provide multiple access points from the school site to the surrounding neighbourhood.
- All pedestrian routes within parking lots should include shade trees along one or both sides of the route.
- All pedestrian routes within parking lots should clearly delineate different user groups through a change in surface materials, a change in grade, soft landscaping, and/or bollards.

### 3.1.5 Bicycle Circulation

- Locate fixed, well-lit bicycle racks in a paved area that can be supervised from the interior of the school. Provide weather protection for bicycle racks where possible.
- Short-term bike parking range: 0.5 – 3 spaces/10 students (minimum 2 spaces) or 3 (+) 0.06-0.0 spaces/100m<sup>2</sup> of interior floor area

### 3.1.6 Transit

- Link active transportation routes from school site to nearby public transit stops.
- Enhance routes between main building entrances and school bus/transit stops.
- Provide weather-protected waiting areas, where possible.
- Provision of transit information on-site.

### 3.1.7 Garbage and Recycling Enclosures

- Locate garbage and recycling waste containers (semi-underground type) out of sightlines from the street.
- Locate garbage and recycling waste containers accommodate safe access by garbage truck and to minimize travel in reverse.
- Size and number of compartments will be determined by the HWDSB.
- The receiving area will have a reinforced concrete apron that slopes away from the building.
- Locate garbage and recycling waste containers adjacent to the custodial, loading and receiving areas.

### 3.1.8 Site Signage

- Clearly display the exterior school identification signage at the front of the building.
- Site signage to include visitor parking, barrier free parking, anti-idling, and fire route access .Provide painted or material changes on the driving and parking surfaces to delineate parking bays, drive aisles, and crosswalks.
- Exterior signage should be located throughout the site to direct traffic and active transportation modes.
- Provide pedestrian-oriented (human-scaled) signage
- Provide an illuminated pylon sign with digital read-out to HWDSB Standards.

### 3.1.9 Outdoor Amenity Spaces (active/passive)

- Attention to the design and functionality of outdoor spaces is vital and has the potential to be an extended learning environment.
- Design the exterior spaces around the school for passive supervision of spaces for social interaction.
- Provide a series of flexible hard and soft surface amenity areas to accommodate a range of uses over time.
- Provide a variety of shaded outdoor spaces including along active transportation pathways on the school site, and adjacent to large open areas for areas of reprieve. Provide playfield (soccer) where the site size permits. Portable soccer posts to be provided as FFE.
- The playfield should be located adjacent to the gym.
- Provide adequate paved area with a selection of basketball hoops depending on grade level, possibly including 3-toss, child-height, wall-mounted, etc. and pavement markings for games.

### 3.1.10 Fences/Gates/Barriers

- Perimeter fences must meet the requirements of Municipal by-laws
- Provide fences (5' chain link) to provide safety and security for the school yard as required by the specific site conditions
- School yards located adjacent to municipal parks may share facilities and a fence between the properties may not be necessary.

### 3.1.11 Exterior Lighting

- The site will be illuminated to create a safe and welcoming environment for students and visitors.
- Provide adequate lighting located on the walls of the school as high as possible to ensure the safety, security and discourage vandalism.
- Provide adequate lighting along active transportation paths at a human-scale/pedestrian level.
- Provide adequate LED lighting at the entrance of the school.
- Conform to municipal lighting guidelines for lighting levels and acceptable standards.
- Site lighting should be designed to take into consideration CPTED Principles.

### 3.1.12 Landscaping

- An integrated landscape strategy should incorporate Low Impact Development (L.I.D.) Standards
- The distribution of landscaping throughout the site can soften hardscapes, including parking areas, maximize shade and provide important storm water runoff mitigation measures.
- Landscape design can enhance the quality of the architecture and accommodate programmed activities such as visual arts, physical education and a safe exterior space for special education classes.
- Design landscaping to be low maintenance.
- Provide plant species with high particulate matter removal capacity, placed strategically on the school site.
- Plantings to be hardy, indigenous, and drought tolerant.
- Planters to incorporate a raised edge adjacent to hard landscape areas as a means of containing planting soil/mulch.
- The landscape design to be compliant with CPTED principles to maintain clear unobstructed views.
- Hard landscaping to be creative and incorporate patterns, colours and textures to enhance visual interest.
- Perimeter landscaping should visually screen parking areas, while not completely obstructing sightlines.
- Refer to the HWDSB Outdoor Design Manual for plant selection, outdoor classrooms, etc.

### 3.1.13 Site Furnishing

- Locate waste and recycling receptacles at all building entry points around the exterior perimeter of the building.
- Fixed and vandal resistant seating to be located at student and visitor entry and drop-off/pick up points and at student gathering spaces.
- Provide bike racks at a secure location where they are visible to staff.

### 3.1.14 Flag Pole

- Locate one flag pole near the main entrance of the building displaying the Canadian flag.

### 3.1.15 Site Drainage

- All site drainage to be self-contained on the site.
- Provide Low Impact Development techniques to improve the quality and quantity of stormwater on-site, through such measures as bio-retention, permeable paving, grass swales, raingardens, vegetated filter strips, dry swales etc.
- If natural techniques are not possible, provide adequate catch basins throughout the site.
- Do not install catch basins in close proximity to the play field. Install at edges of paved play areas.
- Meet or exceed municipal requirements for storm water management.

### 3.1.16 Site Security Provisions

- The safety, security and physical well-being of students and staff must be a priority. The appropriate selection of building materials, equipment, furniture and interior finishes minimizes building occupant's exposure to harmful elements. By employing design and planning strategies which incorporate the fundamental principles embodied in Crime Prevention Through Environmental Design (CPTED) the physical safety of students and staff is ensured.
- Natural Surveillance – the design shall facilitate natural surveillance from occupied or travelled areas of the building to the exterior and within the building.
- Opportunities for concealment should be minimized through the provision of sight lines by avoiding concealed building recesses.
- Ensure trees or landscape features do not offer hiding places.

### 3.1.17 Future Addition/Portables

- Designate area for future portables (up to six) on the site.
- Provision for future power and data, located convenient to potential location of future addition or portables.
- Provide washroom facilities and parking spaces for up to six portables.

### 3.2 Building Design Criteria

The physical surroundings that support learning matter. A strong correlation exists between design of a facility and student achievement and it is the role of educational designers to take every opportunity to enhance teaching and learning through purposeful design of school buildings and grounds. Spatial configurations, noise, heat, cold, light and air quality directly bear on students' and teachers' ability to perform, while the incorporation of environmentally sustainable strategies enhances the quality of the physical environment.

Each student learns differently and that individual learning styles must be accommodated in both the educational program and the design of the learning spaces. Not all learning takes place in a standard classroom. There is a need for a variety of types of learning spaces and for unanticipated learning outside formal teaching areas.

Facility conditions and functionality can affect the way students learn and the effectiveness of how teachers administer the program. If teachers do not have the proper facilities and resources, it is challenging to have the program delivered effectively. Good design has inherent value both socially and economically and it directly affects the well-being of the students, staff and visitors. The following criteria will assist the designer when looking at these areas:

#### 3.2.1 Corridors

- Corridors are typically places of social interaction and communication among students and are therefore opportunities to create spaces for hanging out and socialization.
- Provide minimum corridor width 3000mm clear for circulation.
- Recess display cases, coat hooks, drinking fountains so as not to impede traffic flow.
- Consideration to be given to the acoustics in the corridors to reduce the amount of noise.
- Provide durable and easy to maintain floor surfaces.
- Provide emergency lighting and speakers, fire alarm and strobe lights on walls.
- Centrally locate drinking fountains and water bottle fillers.
- Incorporate views and natural light in the corridor design to provide visual cuing, visual stimulation and way finding.
- Avoid hidden corners and alcoves and ensure clear visibility in all directions.
- Provide coat hooks, in proximity to each classroom, in corridors. No lockers to be provided.

### 3.2.2 Stairways and Elevators

- Centrally locate elevator so that they are conveniently located off the main entrance of the building.
- Locate exit stairs for balanced student distribution throughout the school to prevent congestion.
- Exit stairs to exit directly to the play area at the exterior of the building.
- Provide area of refuge at the top of the stair landings.

### 3.2.3 Washrooms

- Washrooms are to be located on all floors, centrally located and accessible from the corridor.
- Size and quantity to be based on OBC requirements and occupant load
- Provide open access to the washrooms from the corridor with no doors- sight lines to be considered.
- Consider future additions and portables in the washroom count.
- Provide one barrier free stall in each student group washroom and universal washrooms as per OBC requirements.
- Provide floor drains at all washrooms.
- Urinals - allow for privacy partitions, infrared automatic operated.
- Provide universal washroom as per OBC requirements.
- Provide adequate student and staff washrooms distributed throughout the floor levels.
- Washroom accessories include:
  - Tilted mirror (one (1) for every four (4) stalls);
  - Hand dryer (one (1) for every four (4) stalls);
  - Toilet Tissue Holder (one (1) per stall);
  - Sanitary napkin and tampon dispenser (Girl's washroom); and sanitary napkin and tampon disposal (one (1) per stall).
- Recessed stainless steel garbage receptacle
- Barrier Free Stall:
  - Grab Bars as per Building Code;

### 3.2.4 Service Areas and Storage Rooms

- Custodial rooms to be located on every floor and positioned so that they can be easily accessible by custodial staff.
- Custodial rooms are to include:
  - a mop sink;
  - a mop holder;
  - power;
  - and adequate space and a dedicated electrical outlet for a floor scrubber.
- Locate custodial storage rooms adjacent to receiving and recycling areas.
- Academic storage rooms are to be distributed on each floor level near instructional areas.

### 3.2.5 Technology

- Technology is an integral part of our lives and for students it is central to their way of thinking and doing. Technology must be dispersed throughout the school and be available anytime, anywhere.
- Data closets to be logically dispersed and vertically stacked throughout the school to support the schools wireless infrastructure.
- Wireless access points to be located throughout the school. Consult with HWDSB IIT Department for latest standards.

### 3.2.6 Security

- Cameras to be installed only when specifically directed by the Board.
- The design will be conducive to passive security.
- Provide door contacts, glass break detectors and motion detectors as directed by the Board.
- Consult with HWDSB Facilities Management for latest security standards.

### 3.2.7 Drinking Fountains and Water Bottle Fillers

- Located throughout the school outside of washroom areas.
- Additional units should be located outside of physical activity spaces.
- All drinking fountains to be accessible and have water bottle fillers.

### 3.2.8 Coat hooks and Cubbies

- Provide cubbies at Kindergarten classrooms including open shelving above for bin storage, prefabricated coat rack as described below, and continuous bench at 300mm AFF.
- Provide prefabricated 4-tube steel coat hook shelf, with double pronged nylon hooks, staggered at 150mm OC, on each 2nd tube, mounted at 1,000mm AFF for primary grades and 1,300mm AFF for junior/intermediate grades.

### 3.2.9 Casework

- To be located throughout the school in corridors outside of classrooms to display student work and achievements.
- Classroom control panel, as per HWDSB Standards, should include:
  - the light switch, clock, data, thermostat, speakers, duplex receptacle, P.A. call switch, and a single gang box with cover plate from data run from the corridor.

### 3.2.10 White boards and Tack boards

- White boards & Tack boards should be located in every standard classroom.
- Refer to Appendix for Typical Teaching Wall configuration. Confirm with HWDSB for latest standards.

### 3.2.11 Interior Finishes

- Interior finishes for program spaces are included in the program data sheets and include information on: walls, flooring, base and ceilings.

### 3.2.12 Interior Signage

- All areas and circulation systems within the building are to be designed in such a way that way-finding is easy, reducing the reliance on excessive signage.
- Signage mounted perpendicular to the path of travel will assist in ease of wayfinding.
- Applicable codes for barrier free design are incorporated into the design of the way finding system.
- The signs in the facility to be surface mounted and not easily removed. The signage system should allow for changes at minimal cost.
- The types of signs used included:
  - Identification, directional, information and orientation, regulatory and warning, and commemorative and sponsored.
- Interior signage to conform to HWDSB Standard.

### 3.2.13 Window Treatments

- All windows are to be equipped with shading devices (3% Vision).
- Blackout shades are to be provided in the Gym, Cafeteria, Learning Commons and any large assembly rooms.
- Window coverings requiring access over one storey high to be motorized.
- No window coverings required at interior glazing and at exterior corridor/main entrance windows.

### 3.2.14 Materials and Finishes

- Refer to HWDSB Standard for interior and exterior glazing
- Materials and finishes to be vandal resistant and easy to maintain

### 3.3 Specific Program Area Considerations

#### 3.3.1 Learning Commons

- The HWDSB envisions the library as a Learning Commons, at the heart of the school that supports learning and promotes collaboration.
- The function of the Learning Commons is for shared learning and resources, investigation, collaboration, presentation and relaxing. Connections to be provided throughout for laptops and wireless network access.
- Comfort, calmness, uplifting colours and warmth are key components of the Learning Commons use of materials such as carpet, upholstered seating, different lighting options and glass or translucent walls will contribute to achieving comfortable and welcoming spaces.
- Flexible furniture to allow for spaces to be changed will meet student needs and include movable round work tables, lounge type seating and booths.
- Allow for portable book shelving to allow for size of reading sections to be changed.

#### 3.3.2 Special Education

- Every school has its own unique ways of addressing the specific needs of its students therefore it is the intent of the Design Guideline to address methods to accommodate the specific needs of all students, realizing that a large majority of those students identified with special needs may utilize a variety of spaces throughout the school day to address their educational goals.
- The facility requirements must provide the flexibility to address the changing demographics and accommodation for students with special needs.
- Specific program areas for students with special needs will be located in a calm and quiet area of the school integrated with the school population, but with its own sense of identity.
- Since the Design Guideline serves as a guide, it is necessary during the planning process to identify the specific needs of each school in meeting the special needs population and plan early in the process to ensure that those needs are being met through the design.
- Requirements for Quiet Rooms and Sensory Rooms to be reviewed with HWDSB staff at design phase.

## 4.0 OPERATIONS AND MAINTENANCE

### 4.1 Mechanical and Electrical

- Mechanical and Electrical systems to be designed to code requirements
- Systems to be coordinated with HWDSB Facility Department
- Energy efficiency and ease of maintenance to be prioritized
- Meet ANSI standard for Emergency Eyewash and Shower Equipment

### 4.2 Information Technology

- HWDSB Standard Control Panel to be located in all Instructional and Staff Areas.
- HWDSB Standard Teaching Wall to be incorporated in all typical Classroom Instructional spaces and Learning Commons.
- Consult with HWDSB IIT Department to incorporate current technology standards.

### 4.3 Security and Access Control

- Consult with HWDSB Facility Operations Division to incorporate current security requirements.

Notes: • Room layout and specific requirements for Sensory and Quiet rooms, kitchen and other specialty equipment for be reviewed with HWDSB for each location

## 5.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

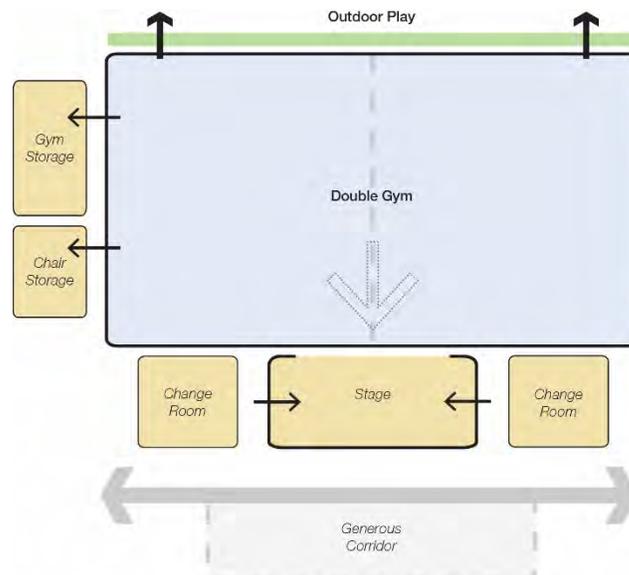

**1.8**

Program Area:	<b>Instructional Spaces</b>		
Room Name:	<b>Gymnasium Area, Gym and Chair Storage</b>	Capacity:	20 per side
		Area (sf):	Varies, see
		Area (SM):	note below
<hr/>			
Program Activities:	<ul style="list-style-type: none"> <li>• Physical education classes and athletic competition and practice during non-school hours</li> <li>• Used for physical education programs and support a range of curricular, co-curricular and community activities</li> <li>• Student assemblies</li> <li>• Community use</li> <li>• Competition basketball and volleyball</li> </ul>		
<hr/>			
Spatial Relationships:	<ul style="list-style-type: none"> <li>• Near front entry of school for controlled access after-hours</li> <li>• Adjacent to outdoor play area</li> <li>• Adjacent to student change rooms</li> <li>• Adjacent to General Purpose/Community room</li> <li>• Connected to gym storage and chair storage</li> <li>• Fixed stage, included in assigned gym floor area</li> </ul>		
<hr/>			
Environmental Considerations:	<ul style="list-style-type: none"> <li>• Natural daylighting (with limited glare)</li> <li>• STC rating (walls): 60</li> <li>• Sound isolation from adjacent spaces</li> <li>• Acoustical control treatment on walls and ceilings</li> <li>• Clear height of 22m from the floor to the nearest obstruction</li> <li>• Individual thermostat control (+/-3°C)</li> </ul>		
<hr/>			
Finishes:			
Floor:	<ul style="list-style-type: none"> <li>• Resilient sports flooring</li> </ul>	Base:	<ul style="list-style-type: none"> <li>• Resilient</li> </ul>
Walls:	<ul style="list-style-type: none"> <li>• Concrete masonry units (painted)</li> <li>• Sound absorption concrete masonry units or abuse resistant acoustical wall treatment</li> </ul>	Ceiling:	<ul style="list-style-type: none"> <li>• Exposed (painted)</li> </ul>
<hr/>			
Furnishings & Equipment:			
Furniture:	<ul style="list-style-type: none"> <li>• N/A</li> </ul>	Fixed Equipment:	<ul style="list-style-type: none"> <li>• 1 set competition (rectangular) basketball backstops, glass – fold up electrically operated</li> <li>• 2 sets practice (fan-shaped) basketball backstops, adjustable height, metal – side fold – manually operated</li> <li>• Volleyball sleeves (confirm diameter with Board), nets and storage stands on a cart</li> <li>• Badminton sleeves (confirm diameter with Board), nets and storage stands on a cart</li> <li>• Gym divider curtain, double vinyl – electrically operated</li> <li>• Wall padding to OPHEA standards behind all backstops and any other hazards</li> </ul>
		Fixed	<ul style="list-style-type: none"> <li>• Projection screens (motorized)</li> </ul>

## 5.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

	Equipment (continued):	<ul style="list-style-type: none"> <li>• 2 1200x1200mm White boards</li> <li>• Gym Storage to include: heavy duty shelving and floor sockets for storage of posts</li> <li>• Blackout shades for exterior windows</li> <li>• Scoreboard with remote controls</li> </ul>
Plumbing:	<ul style="list-style-type: none"> <li>• Drinking fountain outside the entrance with bottle filler</li> </ul>	HVAC: <ul style="list-style-type: none"> <li>• Independent temperature control</li> <li>• Supply/return air system</li> <li>• Heating</li> <li>• Tempered air with stratification fans</li> </ul>
Electrical:	<ul style="list-style-type: none"> <li>• Fluorescent/LED gymnasium type lighting</li> <li>• Multi-level switching</li> <li>• 16 15A-1P duplex wall mounted receptacles for general use</li> <li>• Fire alarm devices to be provided in accordance with ULC code requirements</li> <li>• Electrical connections to P.E. equipment where necessary</li> </ul>	Technology: <ul style="list-style-type: none"> <li>• 1 data/video outlets at each of 2 projectors</li> <li>• 2 data outlets to accompany wall receptacles on perimeter</li> <li>• 2 data/voice outlets for telephone</li> </ul>

- Notes:
- Court markings including basketball, volleyball, badminton (to be confirmed with Board)
  - Provide wire guards on light fixtures and wall-mounted electrical devices
  - Ensure sufficient space around the court for deceleration
  - Allow for a separate entry into each gym section
  - Accommodate stage on long wall of gym for assemblies
  - All glazing to be shatterproof, impact resistant, safety glazing
  - All wall and door mounted devices to be fully recessed
  - Portable sound system to be purchased by school and coordinated with HWDSB IIT Department
  - Requirements for specialty equipment storage to be confirmed with HWDSB
  - Gym and Chair storage room areas are in addition to the allocated gymnasium GFA
  - Gym size to be confirmed by Board, approximate sizes: up to 349 pupil places – 4,500 sf, 350 to 599 pupil places – 5,500 sf, over 600 pupil places – 6,500 sf

## 5.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

**1.9**

Program Area: <b>Instructional Spaces</b>			
Room Name: <b>Stage</b>	Capacity:	Area (sf):	750
		Area (SM):	72
<hr/>			
Program Activities:	<ul style="list-style-type: none"> <li>• Large group, small group &amp; individual instruction</li> <li>• Presentations and performances</li> </ul>		
<hr/>			
Spatial Relationships:	<ul style="list-style-type: none"> <li>• Open to large gymnasium</li> <li>• Near General Purpose Room</li> <li>• Requires dedicated storage room for chairs</li> </ul>		
<hr/>			
Environmental Considerations:	<ul style="list-style-type: none"> <li>• No windows</li> <li>• STC rating (walls): min. 60</li> <li>• Individual thermostat control (+/-3°C)</li> <li>• Requires acoustic considerations between instructional spaces</li> </ul>		
<hr/>			
Finishes:			
Floor:	• Sprung Masonite floor (black)	Base:	• Resilient
Walls:	• Concrete masonry units (painted black)	Ceiling:	• Exposed
<hr/>			
Furnishings & Equipment:			
Furniture:	Fixed Equipment:	<ul style="list-style-type: none"> <li>• Stage walk-drawn main curtain (to meet CAN/ULC for flame spread rating)</li> <li>• Folding panel partition to separate stage from gym</li> </ul>	
Plumbing:	• None required	HVAC:	<ul style="list-style-type: none"> <li>• Standard ventilation</li> <li>• Air conditioning/heating</li> </ul>
Electrical:	<ul style="list-style-type: none"> <li>• Dedicated stage panel to service stage related loads only</li> <li>• 6 15A-1P duplex wall/mounted perimeter receptacles for general/housekeeping use</li> <li>• Theatre type central sound system complete with amplification, recording, playback and microphone interfacing capabilities, electrical requirements to be coordinated with HWDSB</li> <li>• Single pipe grid with LED specialized stage lighting in stage area – power requirements to be coordinated with HWDSB and stage lighting manufacturer</li> <li>• Power and control requirements for motorized display screen to be coordinated with HWDSB and manufacturer</li> <li>• Additional 15A-1P duplex receptacle (1) to be provided at each projector and locations mandated by CSA code requirements</li> </ul>	Technology:	<ul style="list-style-type: none"> <li>• 1 data outlet for projector where applicable</li> <li>• 1 data outlet at wireless access point (WAP)</li> <li>• 1 data/television outlet at television location where applicable</li> <li>• 3 data outlets to accompany wall receptacles in theatre back stage area for general use</li> <li>• Spare conduit to be installed between stage electrical backboard/electrical closet and gym control location</li> </ul>

## 5.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

---

- Electrical  
(continued):
- Fire alarm signalling device to be provided in accordance with ULC code requirements
  - Classroom control panel:
    - PA system, speaker, thermostat, light switches, clock, power & data outlets
- 

- Notes:
- Single pipe grid for lighting and curtain system
  - Provide barrier-free lift or ramp to stage
  - Large projection screen
  - Minimum 6 metres deep
  - Stage to be 900 to 1000mm high
  - No under-stage chair storage

## 5.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

## 5.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

---

- light switches, clock, power & data outlets
- Electrical  
(continued):
- 40A-2P 240V oven/stove receptacle
  - 1 15A-1P dedicated duplex receptacle for each refrigerator
  - 1 15A-1P dedicated duplex receptacles for each microwave
  - Electrical provisions for stove hood, if required
  - 2 20A-1P GFCI protected duplex counter height receptacles at each counter/kitchenette location – maximum 2 receptacles per 20A circuit

---

Notes: Provide kitchenette with upper and lower cabinets and kitchen island

## 5.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

---

Notes:

- Provide barrier automatic door openers at Main Entrance and any other entrance vestibule as required by OBC
- Designed such that no rooms, doors, millwork or any other protrusion interferes with the required corridor width
- Easily accessible to barrier elevator and washrooms
- Minimum standard corridor width 3000mm
- Recessed sprinkler heads to prevent vandalism
- Where lockers are provided, provide masonry nib walls at each end
- Views to exterior - clear and simple circulation
- Corridor and circulation spaces are used as collaborative spaces - spaces of interaction and gathering to be considered

## A.2. Music Program Start-up List

### Music Program Start-up List

<b>Grades 6-8</b>	1 Conductor Stand	Triangles
10 Flutes	Woodwind Accessories (reeds, cleaning swabs, ligatures, cork grease, extra mouthpieces, – ideally to assign one per student	Sand blocks
10 Clarinets		Claves
2 Bass Clarinets		Wood block
3 Alto Saxophones	Brass Accessories (slide grease, valve oils, various sized mutes, mouthpieces – ideally to assign one per student)	Maracas (pairs and different sizes)
3 Tenor Saxophones		Egg shakers
5 Trumpets		Cluster Bells
4 Trombones	Sterisol and cleaning solutions	Tick tock block
2 French Horns		Cymbals
2 Baritones / Euphoniums	Tuner	Cowbells
1 Drum Set and throne	Brass Mouth Piece extractor	Ocean Drum
Concert Bass Drum and drum stand		25 note Tone Bells (soprano)
Extra snare	<b>Primary/Junior</b>	25 note Tone Bells (alto)
Cymbal Set	3 Soprano Glockenspiels	Shakers
Rhythm Set (wood block, claves, various hand percussion, tambourines, triangles, etc)	3 Alto Glockenspiels	Rain Makers
1 set of Orchestra Bells	1 Bass Metallophone	Rhythm kits – sticks etc...
1 Xylophone	1 Bass Xylophone	
1 bass guitar and amp	5 Alto Xylophone	
Band Methods, Standards of Excellence, Essential Elements, Accent on Achievement (music program)	5 Soprano Xylophone	
Concert Band Sheet Music	2 Alto Metallophone Studio	
Jazz Band Sheet Music	2 Soprano Metallophone	
Keyboard and /or Piano	Hand drums of various sizes	
25 – 30 Music Stands (stand cart)	Tambourines	
	Guiro	
	Cabassa	
	Buffalo Drum	
	Finger cymbals

### 1.1 Executive Summary/Owner's Statement of Requirements

The development of new performance based Design Guideline for transforming Hamilton Wentworth District School Board's secondary schools is both a timely and critical challenge. The context of this work, a response to the Board's documents *Secondary Education of the Future and the HWDSB Secondary Program Strategy*, reinforces its relevancy and urgency for HWDSB. Changing demographics and declining enrolments have resulted in plans for school consolidation and a strategic reconsideration of schools across the entire Board. The HWDSB maintains a moderate secondary school inventory, with the majority of its aging schools requiring upgrades and costly repairs to meet curricular demands and day-to-day operations. Added to these significant financial and scheduling challenges are other critical and emerging issues of new curriculum and program delivery strategies, which need to be physically accommodated and resolved in each HWDSB school. These include: student engagement, wellness, universal design (accessibility); special education delivery for personalized learning; sustainability; and the integration of, and possibilities for, technological change to teaching and learning strategies.

In the HWDSB document from June 2013, "*HWDSB Secondary Program Strategy*", the Board's program strategy/vision states that "all schools are great schools" and students should have choice in diverse program offerings within their home schools. In addition, there should be expanded access for students looking for specialized programs. The goal is for all students to graduate in the HWDSB. The Board's secondary schools require change just to keep pace, let alone be exemplars of supportive environments for enhanced student achievement. The objective is to create exemplary learning environments that meet current and future student needs.

The purpose of the Architectural Design Guideline is two-fold: to create a framework and set of guiding principles to enable all of HWDSB's facilities, both new and existing, to better support new trends in educational delivery and enhance opportunities for student success; and to provide a guideline for the Board's new and improved school facilities to ensure that program strategies can meet the needs of all students in the 21st Century including providing students with safe, inclusive, innovative and engaging school environments.

## 1.0 INTRODUCTION

The new secondary school design guideline aligns with key educational principles and values envisioned by the Board. The design guidelines respond to the current and future needs, unanticipated changes in pedagogy, curriculum, technology and learning expectations. The guideline accommodates a robust enough framework to adapt to specific programming requirements, the community needs and diverse existing site issues. School construction will align with Provincial funding parameters. A new approach to a school layout will introduce new ways of moving through and interacting with a school facility. The design guideline includes input from the school community including educators and students as well as caretaking and maintenance personnel. The concepts illustrated in the guidelines will demonstrate that new forms of learning will require new spatial conditions alongside the traditional teacher fronted rooms, all spaces in a school will be learning spaces and schools and their communities will share resources extensively.

Flexibility in curriculum delivery, based on personalized learning, supported by appropriate technologies and quality learning environments are the basis for the design of the new schools and the alterations to existing schools for HWDSB. The guidelines describe learner centred settings which range from specialized to multi-purpose, from formal to informal and from physical to virtual. Learning spaces must be designed around the patterns of human interaction that respond to the many ways students learn. All learning new spaces will have access to natural light. Renovated spaces will have access to natural light where possible. Wireless network access will be available on demand.

## 1.2 Purpose of the Document

This guideline is written as a performance statement of requirements which focuses on the required performance in use in order to achieve the desired results. This allows for design flexibility which is essential for these facilities since it is meant to apply to both new and existing schools.

Although not written as a prescriptive statement of requirements which is directed more by mandatory codes, standards and regulations, these guidelines take into account the Ministry funding formula and will conform to the Ontario Building Code requirements.

The purpose of this guideline is to provide a framework and specific guidelines for the design of the new secondary schools in the HWDSB and to assist in the planning and development of the additions and alterations for the existing secondary schools. The goal is to provide consistent, clear information for the school Board and the design professionals as a new generation of schools are being created for HWDSB. The guidelines provided establish a uniform level of quality and sustainability for all secondary school buildings. The guideline applies to new school facilities and additions/renovations to existing buildings. The challenge will be to balance between broadly applicable standards and a program delivery for a particular demographic. Further stakeholder, community and student consultation is required in the design and renovation of each school to ensure that the design address specific community needs. The school facility must be responsive to a school district's educational program and demand. The intent of the Design Guideline is to allow the Board to develop building programs and spaces that respond to each school community's unique needs and therefore, the design guidelines will adapt based on the specific and unique characteristics and requirements of each school community and the existing building potential.

The program space summaries provided in the guideline include all the programs offered in the Board and summarize the space requirements for each program space. They will assist the design professional in the placement of programs in relation to each other and in the detailed design of the various spaces. The work sheets include the following information:

- **Area:** Square foot area given for the room is the suggested area based on the Ministry Space Template. The area is given in net square feet/square meters and is defined as the area within the walls of the room.
- **Program Activities:** Includes a description of the types of activities that would occur in this space for the specific program.
- **Spatial Relationships:** Outlines the desired adjacencies that the program would have to other programs or spaces.
- **Environmental Considerations:** Describes what specific environmental considerations the space will need to accommodate the specific program activities, i.e. lighting, HVAC, etc.
- **Finishes:** Outlines what finishes should be considered for the floor, walls, base and ceilings. The finishes stated for the spaces have been developed based on the function of the room.
- **Furniture:** Provides general information regarding the furnishings that may be accommodated in each space. This information is provided only for the purpose of assisting the consultant in the layout of each program area. Furniture selection and procurement are not part of this Guideline.
- **Fixed Equipment:** Describes the casework and equipment to be provided in each space to support the specific program requirements.
- **Plumbing, Electrical, HVAC and Technology Systems Infrastructure:** Items listed in these sections are elements that are specific to the program space that other regular classrooms may not have. For example, the Construction Technology classroom will have special electrical requirements for specialized machinery as well as special exhaust required for dust, etc.
- **Diagrams:** Diagrams of the space have been developed to show how some of the features and loose furnishings may be organized. The space is not required to be designed in the configuration shown but shown as an example to assist the design professional with how the space might be organized.
- **Casework and visual display boards** should reflect the needs of the specific school and its program. The intent of this list is not to mandate casework or visual display boards that may not be needed by a particular program, but rather to be used as a guideline for items that are generally used in this type of space.

### 1.4 The Planning Process

The HWDSB is responsible for defining the educational mission and vision for the Board's secondary schools and creating learning environments that will meet the current and future needs of the students, parents, staff, teachers, administration and community members. The Board has undertaken several meetings, workshops, questionnaires, public consultations and student forums to develop their educational vision for their schools of the future. Both their documents, HWDSB Secondary Program Strategy and Secondary Education of the Future outline in great detail their mission, vision and the future of education for the HWDSB students. These documents laid out the framework for this guideline. The intent of this document is to take these findings and translate them into a guideline that will assist the design professional in designing the appropriate facilities to meet their needs.

### 1.5 Participants and Consultation

Through the process of information gathering, the Board's educators and key stakeholders were engaged in a dialogue where they discussed their concerns, aspirations, and their vision for the school facilities through a series of visioning sessions and workshops. Visioning sessions/workshops were held with program/department leaders from various schools where they were permitted the freedom to express their ideas and concerns.

#### **Teachers Workshop**

The teachers workshop involved over 60 teachers gathered together to discuss a series of questions regarding the current physical condition of their educational spaces and how these spaces support or hinder the way education is being delivered in their schools. Teachers were asked to join groups separate from their discipline to allow for cross-departmental discussions. The teachers discussed the positive and negative aspects of these spaces and provided feedback on their consensus. The following themes were present in the feedback from the teacher's workshop:

- collaborative large group spaces and individual small group study spaces are required
- both break-out areas and quiet rooms are required
- common spaces must be multi-purpose and multi-functional
- school entrances must be welcoming to all
- indoor and outdoor physical and visual connectivity is essential
- strong school and community connectivity should be shared spaces

#### **Curriculum Leaders**

Specific program requirements were discussed with the various curriculum leaders who provided detailed information about what was required in specific program areas. The educators described the program activities and learning objectives for each program, identifying possible curriculum relationships and required special relationships to other programs, identifying specific materials, resources, equipment or tools required for the program spaces. The objective was to create a performance based documentation of requirements identifying how the school building can support students and teachers. Each participant answered individually and then gathered in their respective program groups to try to find consensus on the issues. The intent of the questionnaire was not as a statistical tool but as a method of starting a conversation.

### Student Voice Forum

The Director's Student Voice Forum held at Sir John A McDonald High School provided students an opportunity to look at various new spaces for learning around the world and to express their ideas for a new school environment through words and pictures. The caption that they were to address was: "If I could build a perfect school, what would it look like?" Many students later posted their comments on the HWDSB blog.

Some of the themes that emerged from the blogs and discussions at the forum include:

- creating creative learning environment that would make many different kinds of people more comfortable so that they can learn better
- the building itself would be taken care of and not in poor condition
- very modern rooms with comfortable chairs
- more windows and bright colours to help uplift moods instead of having schools look plain, boring & depressing
- personalized spaces, small group spaces- indoors and out, quiet spaces for study

### Principals Meeting

The Principals from the Board's existing Secondary Schools provided useful feedback on how they see the future delivery of education within the HWDSB. Some of the recurring themes included:

- flexibility and the ability to transform spaces into a number of smaller sized rooms to accommodate different sized instructional spaces. This would allow for the ability to team teach various subjects.
- the Principals supported the idea of organizing the science subjects into a suite where they would have shared labs with multiple classrooms attached to it.
- teacher work areas should be organized as shared lockable space for meeting with "hoteling desks" big enough for more than one department to encourage collaboration
- heritage aspect of the closing schools should be incorporated into to the existing and new schools – value history and legacy.
- more glassed in areas so that there are quiet spaces with visual access

### Trustees Discussions

The trustee interviews took place over a series of individual conference calls. The trustees commented on their priorities for the secondary school facilities, both new and upgraded. The recurring themes include:

- students will have access to a variety of safe, quiet and comfortable spaces
- there will be a variety of comfortable and casual spaces which will be open and distributed throughout the school for student gathering, connections for laptops and places for food and drink
- students will have places to display student work, announcements, digital monitors in atrium, corridors, cafeteria for announcements and student TV
- the cafeteria and learning commons will be designed as multi-functional, informal and personal space
- the Learning Commons will be open morning, lunch and after school so that students have access to analogue and digital sources, technology and learning resources.
- the Learning Commons should be adjacent to co-op and student services
- corridors and lockers should be designed to create collaborative spaces, group and individual (like a hotel lobby) with lots of power, comfortable furnishings, wider, safer and colourful
- the cafeteria should be designed as a multi-purpose space to eat, work, socialize and attend clubs. It should provide a variety of accommodations for students such as eating bar, nooks, round tables that also revert back to large scale gathering, good wifi and lots of power, outdoor places to eat
- existing auditoriums are important spaces in the Board's existing inventory of schools.
- creating community partnerships is critical
- investing in sustainable initiatives that benefit student learning and demonstrate green to the students, staff and community is imperative
- the goal is to create a culture of learning by creating all spaces as places for learning and ensure that program opportunities in each school truly reflect the specific needs, routes for those students & communities

The following guiding principles are consistent with the commitment to provide quality teaching and learning environments that are driven by the needs of students and programs:

All schools will be great schools  
– new and existing

Create flexible, robust and adaptable  
– exemplary learning environments,  
accommodating diverse learning styles,  
in all program areas and for all pathways

Create flexible, robust and adaptable  
– collaborative settings – break-out  
spaces, eating spaces, social spaces for  
students and staff

Create flexible, robust and adaptable –  
spaces for community use, now and in  
the future

Provide personalized, informal, social  
and study spaces for students (indoors  
& outdoors) that promote student  
ownership, student voice and student  
engagement

Provide professional, collaborative,  
multi-disciplinary, social and work  
spaces for teachers and staff

Enable students and staff to achieve  
their maximum potential by providing  
healthy, safe, inclusive and comfortable  
environments

Promote facilities at all schools that  
support a healthy and active lifestyle

Imagine the Learning Commons as  
a fully integrated and central node  
for formal and informal study – with  
unlimited access to multiple resources,  
learning supports and student services

Provide abundant and robust  
infrastructure to fully integrate  
technology tools in all aspects of  
teaching and learning

Design safe and welcoming school  
grounds that provide a variety of outdoor  
amenity spaces to accommodate  
multiple activities, both active and  
passive

Design facilities that are easy to build,  
maintain and operate - minimizing  
negative environmental impacts and  
maximizing the use of non-polluting,  
renewable resources

Align facilities with Board's mission and  
vision, and the Board's secondary school  
initiatives – Secondary Education of the  
Future and HWDSB Secondary Program  
Strategy – which provide a framework  
and strategic direction for schools that  
prepare HWDSB's students for the 21st  
Century

Maximize facilities opportunities  
respecting the framework and  
guidelines of the Ministry of Education  
Funding and Space Templates and Area  
Benchmarks

The following Planning Concepts describe a fundamental philosophical approach to the design of all spaces within an exemplary learning environment.

### 3.1 Welcoming Entry

- The main entry to the school will be familiar and friendly to students, staff, parents and the wider community and should invite and encourage them into the school.
- The main entry should be exciting, inclusive, welcoming and open, light, safe, well maintained and demonstrate the values of the school community.
- A Separate Quiet and secure entrance should be designed to accommodate students with specific needs.
- Provide space for display of student work.

### 3.2 Comfort

- Students learning is improved in a comfortable, environment promoting engagement and connections with the other students and teaching staff as a community.
- Spatial configurations, noise, heat, cold, light and air quality directly bear on students' and teachers' ability to perform. The incorporation of environmentally sustainable strategies enhances the quality of the physical environment.
- Comfort is essential to the wellbeing and success of students and teachers.
- Individual seating must take into account different body sizes and the periods of time learners need to occupy seating. Seating should be comfortable and ergonomically amenable.
- Varying types of movable and reconfigurable seating and lounging will provide comfort for varying types of learners and pedagogues.
- All areas in the school will provide surfaces for writing and supporting computers, books, and other materials.
- Responsive heating and ventilation and variable lighting that can be controlled in individual spaces will accommodate different teaching modalities and user needs.
- Students require controlled natural and task-appropriate lighting and interesting room shapes and configurations. Spaces with multiple and accessible light levels help to create interest and engages learners.

### 3.3 Flexible/Adaptable/Robust

- Students and teachers require a variety of instructional space sizes in order to allow for flexible teaching and learning arrangements. The school environment needs to respond to the varying ways students learn. Both large collaborative group spaces and individual small group spaces need to be accommodated to allow students and teachers the flexibility to adapt to different learning and teaching styles.
- Adaptability and flexibility are critical to effective learning environments, therefore, buildings must be planned to adapt to inevitable changes at minimum expense and little disruption of the educational process. Approaches to learning vary over time and from one staff member to another. A robust design will be able to accommodate flexibility and change comfortably with minimal disruption to the educational process.
- There are a number of strategies that can be employed, such as: providing individual, small group and larger group learning spaces; grouping together teaching areas that can benefit from multiple uses; classroom designs which allow for a variety of layouts; and careful planning of community use facilities that can be easily accessed and secured from other school areas.
- Designing various size and types of spaces for comfortable social interaction will give students and staff options.

### 3.4 Learning and Amenity Spaces (Student Commons)

- Students and teachers need a variety of instructional space sizes in order to allow for flexible teaching and learning arrangements. The school environment needs to respond to the varying ways students learn; therefore, both formal and informal large collaborative group spaces and individual small group spaces need to be accommodated to allow students and teachers flexibility.
- Individual quiet spaces and group collaborative spaces to study and concentrate are important and need to be accommodated in many areas of the school.
- Collaborative large group spaces and project spaces are required but should be designed so that they can transform into smaller individual group spaces or break out spaces.
- The “group of rooms” concept eliminates the corridor used by the public traditionally located between the classrooms and opens up the space that can be used by for serendipitous meeting and learning.
- Extended Learning Areas or Commons provide students, staff, and teachers with areas adjacent to classrooms where a multitude of activities can take place. This space will not have walls and is intended to “Extend” the classroom for instructional or support purposes.

### 3.5 Daylight and Views

- Natural daylight contributes positively to the development and growth of student accomplishment.
- Lighting, day lighting and natural ventilation controls should be available to occupants to customize the comfort of spaces dependant on the current activity.
- Every new learning space will have access to natural daylight, either directly or indirectly. Renovated spaces will have access to natural light where possible.
- Views to the exterior are essential to assist with way finding, passive security and allows for visual stimulation.
- Views will be provided from learning spaces and circulation spaces.

### 3.6 Transparency

- Designs need to allow for passive supervision by employing transparent materials including glass while incorporating appropriate features for lockdown.
- Rooms that open to each other and allow a connection between learning spaces of different types will support team teaching and interdisciplinary program cross overs.
- Design strategies that address visibility and transparency include:
  - learning clusters which are home to smaller student groups;
  - creating collaborative staff work areas at strategic points with views of circulation routes;
  - interior glazing to teaching areas;
  - open areas providing visibility from one floor to another;
  - and avoiding alcoves that can be used for intimidating activity.

### 3.7 Wellness

- The buildings physical environment will contribute to the wellbeing of its occupants.
- The ability to control the temperature, lighting and furniture will improve the overall comfort level and encourage students to learn and concentrate and allow teachers to carry out their daily activities comfortably.

### 3.8 Display Space and Artwork

- Student display cases should be prominently located throughout the school to allow students the opportunity to exhibit their work.
- Additional display cases should be located close to or outside of the visual arts rooms, science suites, music rooms and physical activity spaces.
- Display space and artwork is not specifically addressed in the OBC but is discussed in the Ontario Fire Code (OFC) which references decorative materials installed in an exit serving an assembly occupancy with an occupant load of more than 100 persons. Although the intent was meant to address draperies and tapestries, some authorities may view this as applicable to artwork and student displays. The quantity and location of display spaces and artwork needs to be reviewed with the local Municipal Authorities. Refer to RBA report in the Appendix.

### 3.9 Technology

- Collecting, analyzing, displaying and disseminating knowledge, typically involves technology.
- Technology is an integral part of our lives and for students it is central to their way of thinking and learning. Technology must be dispersed throughout the school and be available anytime, anywhere.
- Seamless integration of technology with wireless capability available everywhere and for everyone.
- Abundant outlets must be provided for charging of portable devices.
- Surfaces that can be projected upon and written upon to be located throughout the facility.

### 3.10 Safety and Security (CPTED)

- Lockdown is the restriction of movement during the time of a potentially serious violent incident that would endanger the lives of students and staff.
- The safety, security and physical well-being of students is the Board's highest priority. Great care needs to be employed in the ensuring physical safety, employing design and planning strategies which incorporate the fundamental principles embodied in Crime Prevention Through Environmental Design [CPTED] — natural surveillance (visibility); natural access control; and territoriality.
- Refer to the HWDSB Lockdown, Hold and Secure, Shelter in Place Directive

### 3.11 Sustainability

- Recycling, natural ventilation, day-lighting, edible gardens, and other sustainable strategies should be integrated into the facility and become part of the curriculum strategy.
- Energy efficient features shall be incorporated into school facilities design.
- Promoting the design and construction of green schools will make a significant impact on student health, teacher retention, school operating costs and the environment.
- Provide solutions that effectively minimize negative impacts on the environment.
- Design concepts need to address durability, impact on operating costs and ease of maintenance.
- Reduced site impacts and off-site impacts.
- Reduced energy and water consumption.
- Improve indoor environmental quality.
- Increase construction waste diversion and recycling, material re-use and recycled content, improved durability, longevity and maintainability.
- Reduce both long term and ongoing environmental load of a building.
- Demonstrate the sustainable features of the school as an interactive learning experience for the students and a model for the community.

### 3.12 Universal Accessibility

- Provide a very high standard for barrier-free accessibility, accomplished in a seamless manner, to ensure that universal access, for all students and staff of all abilities, is fully integrated throughout the facility.
- Municipal codes and laws are in place to ensure that full accessibility will be incorporated throughout all the facilities.
- The design and planning must be all encompassing, accommodating people of all ages and all levels of ability.

### 3.13 Indoor/Outdoor Physical and Visual Connectivity

- Provide interior and exterior views and vistas.
- Provide interior window partitions to encourage collaboration and provide supervision.

### 3.14 School/Community Connections

- Designing with a focus on community involves components of the building having a clear identity that distinguishes it as a memorable presence.
- The facility should also clearly address the convenient use of the building's facilities securely and independently as required by each user. All of these factors will promote a sense of ownership and community shared between the many diverse users.

### 3.15 Heritage

- Alterations, additions or replacement of existing school communities require sensitivity to the culture, history and heritage of the school as both a building and an institution
- Strategies may include concepts to preserve, reintegrate and reintroduce important historical elements of the old school into the new design
- Building systems upgrades, Ontario Building Code compliance and retrofits for universal accessibility must be accommodated

### 3.16 Operations/Maintenance

- The selection of building materials and equipment will be easily maintained and selected in conjunction with the buildings operations and maintenance staff.

### 3.17 All Spaces will be Learning Spaces

- All spaces within the school will promote and encourage socialization, learning and collaboration. Providing a variety of interior and exterior spaces for gathering will allow for multiple learning opportunities.
- Providing furniture and other loose furniture in open areas such as corridors and student commons will need to be reviewed with the municipal authorities to ensure that exit widths are maintained and fire codes are respected.

### 4.1 Site Design Criteria

A school is an important community institution and the site must reflect this. School sites accommodate a variety of activities which must be accommodated in a safe and secure manner. School sites are a gathering space for people and should not appear car-centric.

Outdoor activity is a critical element in learning, enabling students to develop self-confidence, use their imaginations, learn self-discipline and compromise, improve motor skills, while improving their physical fitness. Site design, including passive and active commons for student gathering, can provide for casual interactions, outdoor eating areas, structured learning, sports and physical activities, and quiet individual spaces for reading or reflection.

Site selection applies to new construction. A review of the site selection criteria is required for additions to existing facilities to determine if the existing site can accommodate the site design requirements. Factors to be used in judging the merits of a site include aesthetic considerations, City of Hamilton Site Design Guidelines, local Policy, Codes and Zoning, easements/right-of-way, provincially mandated Green Schools Resource Guide standards, best-practice in environmentally sustainable design, pedestrian-oriented (or human-scaled) design standards, and safe access routes for all modes of transportation.

Site design criteria should strive to reflect the principles of the HWDSB Active & Sustainable School transportation (ASST) Charter signed by the board October 2015.

1. Street design for comfort, convenience, and safety for all users
2. Supportive land use and site planning
3. Personal and community safety
4. Partnership, collaboration, and shared responsibility
5. A culture of active and sustainable transportation

#### 4.1.1 Vehicular Access

- Bus loading area sized to meet the anticipated number of buses. (work with City for off-site bus drop-off/ bus lay-by.
- Schools with two frontages to locate bus lay-by at side of the school.
- Locate the bus zone so that passengers do not need to cross any vehicular traffic.
- Locate the bus loading zone east of but not directly beside playgrounds, windows, and doors where students can be exposed to vehicle emissions.
- Separate student, bus, and staff vehicular traffic.

### 4.1.2 Parking

- Provide parking areas that are not only efficient, but safe, attractive, and environmentally responsible.
- Parking areas should be carefully designed to enhance the local urban design and environmental conditions, not detract or overwhelm them.
- Surface parking design should
  - Mitigate urban heat-island effect;
  - Manage stormwater runoff on-site;
  - Incorporate best-practice Low Impact Development techniques;
  - Create direct, legible, safe and comfortable pedestrian and bicycle routes;
  - Enhance the public realm.
- Provide no more than the minimum number of parking spaces as designated by the municipal by-laws and the Board's specific site requirements for staff, visitors, and students.
- Provide heavy duty paved surface in all fire route locations.
- Provide barrier free parking adjacent to the main entrance and so that people do not need to cross any vehicular traffic to enter the building.
- Anticipate the need for school expansion by way of future portables. With this in mind, provide flexible areas that may be converted into future parking as required..
- Where pedestrian and vehicular conflicts may arise, provide clear delineation by way of surface treatment variation, bollards, planting strips, or curbing whether flush, rolled or barrier.
- Locate curbs between pedestrian circulation and vehicular traffic.
- Provide landscaped islands and/or drainage swales to reduce heat island effect and mitigate stormwater runoff.
- Provide snow storage areas with appropriate site drainage.
- Reduce the number of driveway connections to the public street to strengthen streetscape and to minimize pedestrian-vehicle conflict points
- Locate driveways opposite existing or proposed driveways and streets to avoid offset intersections and traffic difficulties
- Provide a designated pathway through parking areas to building entrances for drivers
- Break-up large parking lots with landscaping to minimize the appearance of expansive impermeable surfaces
- Where walkways cross vehicular circulation routes, use alternative hard surface materials or raised crosswalks.
- Provide short-term parking spaces with anti-idling signage.

### 4.1.3 Service Vehicles Circulation

- Separate service vehicle circulation from other vehicular circulation, where possible
- Provide direct access to the receiving, garbage/recycling, and loading areas.
- Meet the requirement of municipal by-laws.
- Provide heavy duty paved surfaces for access to loading, garbage and receiving areas

### 4.1.4 Pedestrian Circulation

- Provide a clear, legible, and continuous pedestrian network throughout the site and parking areas.
- Provide minimum 2m AODA standard facility (multi-use path to separate active transportation circulation from vehicular traffic)
- All grade transitions are to be fully accessible, incorporating the City of Hamilton Urban Braille Standards.
- Clearly defined active transportation routes to be logically laid out and illuminated to allow students and visitors to navigate the entire site in a safe manner with convenient access to all doors around the perimeter of the building and parking area.
- Clearly define fully accessible routes to all areas of the school site through the application of the City of Hamilton's Urban Braille Standards.
- Link active transportation routes from building entrances to public sidewalks and bicycle network
- Provide multiple access points from the school site to the surrounding neighbourhood.
- All pedestrian routes within parking lots should include shade trees along one or both sides of the route.
- All pedestrian routes within parking lots should clearly delineate different user groups through a change in surface materials, a change in grade, soft landscaping, and/or bollards.

### 4.1.5 Bicycle Circulation

- Locate fixed, well-lit bicycle racks in a paved area that can be supervised from the interior of the school. Provide weather protection for bicycle racks where possible.
- Short-term bike parking range: 0.5 – 3 spaces/10 students (minimum 2 spaces) or 3 (+) 0.06-0.0 spaces/100m<sup>2</sup> of interior floor area

### 4.1.6 Transit

- Link active transportation routes from school site to nearby public transit stops.
- Enhance routes between main building entrances and school bus/transit stops.
- Provide weather-protected waiting areas, where possible.
- Provision of transit information on-site.

### 4.1.7 Garbage and Recycling Enclosures

- Locate garbage and recycling waste containers (semi-underground type) out of sightlines from the street.
- Locate garbage and recycling waste containers accommodate safe access by garbage truck and to minimize travel in reverse.
- Size and number of compartments will be determined by the HWDSB.
- The receiving area will have a reinforced concrete apron that slopes away from the building.
- Locate garbage and recycling waste containers adjacent to the custodial, loading and receiving areas.

### 4.1.8 Site Signage

- Clearly display the exterior school identification signage at the front of the building.
- Site signage to include visitor parking, barrier free parking, anti-idling, and fire route access. Provide painted or material changes on the driving and parking surfaces to delineate parking bays, drive aisles, and crosswalks.
- Exterior signage should be located throughout the site to direct traffic and active transportation modes.
- Provide pedestrian-oriented (human-scaled) signage
- Provide an illuminated pylon sign with digital read-out to HWDSB Standards.

### 4.1.9 Outdoor Amenity Spaces (active/passive)

- Attention to the design and functionality of outdoor spaces is vital and has the potential to be an extended learning environment.
- Design the exterior spaces around the school for passive supervision of spaces for social interaction.
- Provide a series of flexible hard and soft surface amenity areas to accommodate a range of uses over time.
- Provide a variety of shaded outdoor spaces including along active transportation pathways on the school site, and adjacent to large open areas for areas of reprieve.
- Provide sodded practice field where the site size permits.
- Provide combo soccer/football posts, six lane running track and long jump pits, where directed by the Board
- The playfield should be located adjacent to the gym.
- Provide adequate paved area with basketball hoops, where possible.

### 4.1.10 Fences/Gates/Barriers

- Perimeter fences must meet the requirements of Municipal by-laws
- Provide fences to provide safety and security for the school yard as required by the specific site conditions
- Ensure breaks/gates in fencing to allow multiple access points from the community to the school site.
- School yards located adjacent to municipal parks may share facilities and a fence between the properties may not be necessary
- Secure fences with heavy duty swing gates are required at outdoor storage and works compounds

### 4.1.11 Exterior Lighting

- The site will be illuminated to create a safe and welcoming environment for students and visitors.
- Provide adequate lighting located on the walls of the school as high as possible to ensure the safety, security and discourage vandalism.
- Provide adequate lighting along active transportation paths at a human-scale/pedestrian level.
- Provide adequate LED lighting at the entrance of the school.
- Conform to municipal lighting guidelines for lighting levels and acceptable standards.
- Site lighting should be designed to take into consideration CPTED Principles.

### 4.1.12 Landscaping

- An integrated landscape strategy should incorporate Low Impact Development (L.I.D.) Standards
- The distribution of landscaping throughout the site can soften hardscapes, including parking areas, maximize shade and provide important storm water runoff mitigation measures.
- Landscape design can enhance the quality of the architecture and accommodate programmed activities such as visual arts, physical education and a safe exterior space for special education classes.
- Design landscaping to be low maintenance.
- Provide plant species with high particulate matter removal capacity, placed strategically on the school site.
- Plantings to be hardy, indigenous, and drought tolerant.

- Planters to incorporate a raised edge adjacent to hard landscape areas as a means of containing planting soil/mulch.
- The landscape design to be compliant with CPTED principles to maintain clear unobstructed views.
- Hard landscaping to be creative and incorporate patterns, colours and textures to enhance visual interest.
- Perimeter landscaping should visually screen parking areas, while not completely obstructing sightlines.

### 4.1.13 Site Furnishing

- Locate waste and recycling receptacles at all building entry points around the exterior perimeter of the building, and at high volume outdoor areas including, but not limited to running tracks, baseball diamonds, playgrounds etc.
- Fixed and vandal resistant seating to be located at student and visitor entry and drop-off/pick up points and at student gathering spaces.
- Provide bike racks at a secure location where they are visible to staff.

### 4.1.14 Flag Pole

- Locate 1 flag pole near the main entrance of the building displaying the Canadian flag.

### 4.1.15 Site Drainage

- All site drainage to be self-contained on the site.
- Provide Low Impact Development techniques to improve the quality and quantity of stormwater on-site, through such measures as bio-retention, permeable paving, grass swales, raingardens, vegetated filter strips, dry swales etc.
- If natural techniques are not possible, provide adequate catch basins throughout the site.
- Do not install catch basins in close proximity to the play field. Install at edges of paved play areas.
- Meet or exceed municipal requirements for storm water management.

### 4.1.16 Site Security Provisions

- The safety, security and physical well-being of students and staff must be a priority. The appropriate selection of building materials, equipment, furniture and interior finishes minimizes building occupant's exposure to harmful elements. By employing design and planning strategies which incorporate the fundamental principles embodied in Crime Prevention Through Environmental Design (CPTED) the physical safety of students and staff is ensured.
- Natural Surveillance – the design shall facilitate natural surveillance from occupied or travelled areas of the building to the exterior and within the building.
- Opportunities for concealment should be minimized through the provision of sight lines by avoiding concealed building recesses.
- Ensure trees or landscape features do not offer hiding places.

### 4.1.17 Future Addition/Portables

- Designate area for future portable locations on the site plans.
- Provision for power and data located convenient to potential location of future addition or portables.
- Provide washroom facilities and parking spaces for up to 6 portables.

### 4.2 Building Design Criteria

The physical surroundings that support learning matter. A strong correlation exists between design of a facility and student achievement and it is the role of educational designers to take every opportunity to enhance teaching and learning through purposeful design of school buildings and grounds. Spatial configurations, noise, heat, cold, light and air quality directly bear on students' and teachers' ability to perform, while the incorporation of environmentally sustainable strategies enhances the quality of the physical environment.

Each student learns differently and that individual learning styles must be accommodated in both the educational programme and the design of the learning spaces. Not all learning takes place in a standard classroom. There is a need for a variety of types of learning spaces and for unanticipated learning outside formal teaching areas. There are a number of strategies that can be employed in this regard including: the provision of seminar rooms strategically located throughout the plan; grouping together teaching areas to enhance cross-curricular and team teaching opportunities; the integration of technology-based programs with academic programming throughout the design; and the creation of dynamic social spaces that create a cultural hub for the school, where larger groups of students, staff and others can gather for group activity and informal exchange of ideas.

The following criteria will assist the designer when looking at these areas:

#### 4.2.1 Corridors

- Corridors are typically places of social interaction and communication among students and are therefore opportunities to create spaces for hanging out and socialization.
- Provide minimum corridor width 3000mm clear for circulation.
- Recess display cases, lockers, drinking fountains so as not to impede traffic flow – unobstructed movement.
- Consideration to be given to the acoustics in the corridors to reduce the amount of noise.
- Provide durable and easy to maintain floor surfaces.
- Provide emergency lighting and speakers, fire alarm and strobe lights on walls.
- Centrally locate drinking fountains and water bottle fillers.
- Incorporate views and natural light in the corridor design to provide visual cuing, visual stimulation and way finding.
- Avoid hidden corners and alcoves and ensure clear visibility in all directions.
- Provide lockers in corridors.
- Look at opportunities to provide a “group of rooms” which eliminates the corridor used by the public between a series of classrooms with the desire to increase efficiency in the floor area and create a more open plan concept. The corridor used by the public would have to terminate at an exit stair on either end with no dead end condition being created.

#### 4.2.2 Stairways and Elevators

- Centrally locate elevators so that they are conveniently located off the main entrance of the building.
- Locate exit stairs for balanced student distribution throughout the school to prevent congestion.
- Exit stairs to exit directly to the exterior of the building.
- Provide area of refuge at the top of the stair landings.

### 4.2.3 Washrooms

- Washrooms are to be located on all floors, centrally located and accessible from the corridor.
- Size and quantity to be based on OBC requirements and occupant load
- Provide open access to the washrooms from the corridor with no doors- sight lines to be considered.
- Consider future additions like portables in the washroom count.
- Provide one barrier free stall in each student group washroom and universal washrooms as per the OBC requirements.
- Provide floor drains.
- Urinals - allow for privacy partitions, infrared automatic operated.
- Provide one inclusive universal barrier free washroom for student use on each floor level.
- Provide adequate student and staff washrooms distributed throughout the floor levels.
- Washroom accessories include:
  - Tilted mirror (one (1) for every four (4) stalls);
  - Hand dryer (one (1) for every four (4) stalls);
  - Toilet Tissue Holder (one (1) per stall);
  - Recessed stainless steel garbage receptacle;
  - Sanitary napkin and tampon dispenser (Girl's washroom);
  - and sanitary napkin and tampon disposal (one (1) per stall).
- Barrier Free Stall:
  - Grab Bars as per building code

### 4.2.4 Service Areas and Storage Rooms

- Custodial rooms to be located on every floor and positioned so that they can be easily accessible by custodial staff.
- Custodial rooms are to include:
  - a mop sink;
  - a mop holder;
  - power;
  - and adequate space and a dedicated electrical outlet for a floor scrubber.
- Locate custodial storage rooms adjacent to receiving and recycling areas.
- Academic storage rooms are to be distributed on each floor level near instructional areas.

### 4.2.5 Technology

- Technology is an integral part of our lives and for students it is central to their way of thinking and doing. Technology must be dispersed throughout the school and be available anytime, anywhere.
- Data closets to be logically dispersed and vertically stacked throughout the school to support the schools wireless infrastructure.
- Wireless access points to be located throughout the school. Consult with HWDSB IIT Department for latest standards.

### 4.2.6 Security

- Cameras to be located throughout the school, inside and outside, especially in concealed areas, as directed by the Board.
- The design will be conducive to passive security.
- Provide door contacts, a glass break detectors and motion detectors as directed by the Board.
- Consult with HWDSB Facilities Management for latest security standards.

### 4.2.7 Drinking Fountains and Water Bottle Fillers

- Located throughout the school outside of washroom areas.
- Additional units should be located outside of physical activity spaces.
- All drinking fountains to be accessible and have water bottle fillers.

### 4.2.8 Lockers

- There are to be a variety of locker sizes including full height and half size lockers, allowing for student choice.
- Provide lockers with sloped tops or bulkheads overtop.

### 4.2.9 Casework

- To be located throughout the school in corridors outside of classrooms to display student work and achievements.
- Classroom control panel, as per HWDSB Standards, should include:
  - the light switch, clock, data, thermostat, speakers, duplex receptacle, P.A. call switch, and a single gang box with cover plate from data run from the corridor.

### 4.2.10 Whiteboards and Tack boards

- Whiteboards & Tack boards should be located in every standard classroom.
- Refer to Appendix 3 for Typical Teaching Wall configuration. Confirm with HWDSB for latest standards.

### 4.2.11 Interior Finishes

- Interior finishes for program spaces are included in the program data sheets and include information on: walls, flooring, base and ceilings.

### 4.2.12 Interior Signage

- All areas and circulation systems within the building are to be designed in such a way that way-finding is easy, reducing the reliance on excessive signage.
- Signage mounted perpendicular to the path of travel will assist in ease of wayfinding.
- Applicable codes for barrier free design are incorporated into the design of the way finding system.
- The signs in the facility to be surface mounted and not easily removed. The signage system should allow for changes at minimal cost.
- The types of signs used included:
  - Identification, directional, information and orientation, regulatory and warning, and commemorative and sponsored.
- Interior signage to conform to HWDSB Standard.

### 4.2.13 Window Treatments

- All windows are to be equipped with shading devices in exception for all open spaces such as stairs/ corridors
- roller shades to be 3% open
- Blackout shades are to be provided in the Gym, Cafeteria, Learning Commons and any large assembly rooms.
- window coverings requiring access over one storey high to be motorized.

### 4.2.14 Materials and Finishes

- Refer to HWDSB Standard for interior and exterior glazing
- Materials and finishes to be vandal resistant and easy to maintain

### 4.3 Specific Program Area Considerations

#### 4.3.1 Learning Commons

- The HWDSB envisions the library as a Learning Commons, at the heart of the school that supports learning and promotes collaboration.
- The function of the Learning Commons is for shared learning and resources, investigation, collaboration, presentation and relaxing. Connections to be provided throughout for laptops and wireless network access.
- Comfort, calmness, uplifting colours and warmth are key components of the Learning Commons use of materials such as carpet, upholstered seating, different lighting options and glass or translucent walls will contribute to achieving comfortable and welcoming spaces.
- The Learning Commons should incorporate different types of spaces for seminar rooms, quiet work rooms space and group work rooms.
- Flexible furniture to allow for spaces to be changed will meet student needs and include movable round work tables, lounge type seating and booths.
- Allow for portable book shelving to allow for size of reading sections to be changed.
- Locate the printer in an area that can be visually supervised from the circulation desk, in where noise is not a disruption to students or staff.
- Security gates are to be located at the entrance of the library.
- Librarian centre including the Technology centre for distribution and storage of I-pads, keyboards, charging, etc., should be centrally located to allow for visual surveillance.

#### 4.3.2 Science Suite

- The science suite takes a new approach to the delivery of the science curriculum. Formal instructional spaces are grouped with a shared lab between them. Each lab setting has wireless network access and fixed gas and water available for student projects and experiments in all science disciplines.
- Shared multi-purpose labs are designed to accommodate both chemistry and biology curriculum requirements
- Regular sized instructional classrooms are planned adjacent to the oversized shared lab spaces. The classrooms would include a teacher's demonstration desk complete with gas and water. The science lab space is booked as required for a full class, or individual or group work demonstrations.
- The science preparation area including the secure chemical storage room is to be located between the labs.
- A staff work area, creating a professional community of teachers, is centrally located.

#### 4.3.3 Cafeteria

- The cafeteria is to be located on the ground floor and will be used by students for eating, studying and socializing and will be used as spaces for clubs to meet and other informal gatherings.
- Locate the cafeteria adjacent to a secure exterior space, i.e. a courtyard to allow students the opportunity for eating outside.
- Alternative spaces i.e. Student Commons will accommodate students for eating.
- Provide connections for use of laptops and wireless network access
- A variety of seating areas to be provided, for large and small groups with the flexibility to reconfigure for large group assemblies

### 4.3.4 Performance Spaces

- Provide spaces for both formal and informal student performances
- Locate stage to open onto a suitable large assembly space with flexible accommodations for seating with appropriate sight-lines and acoustics

### 4.3.5 Technology (integrated)

- Technology is to be provided throughout the school and is to be robust to accommodate various devices and accessible in all areas of the building.
- Charging stations are required throughout.
- The Technology Centre is to be located in or adjacent to the Learning Commons.

### 4.3.6 Special Education

- Every school has its own unique ways of addressing the specific needs of its students therefore it is the intent of the Design Guideline to address methods to accommodate the specific needs of all students, realizing that a large majority of those students identified with special needs may utilize a variety of spaces throughout the school day to address their educational goals.
- The facility requirements must provide the flexibility to address the changing demographics and accommodation for students with special needs.
- Specific program areas for students with special needs will be located in a calm and quiet area of the school integrated with the school population, but with its own sense of identity.
- Since this document serves as a guide, it is necessary during the planning process to identify the specific needs of each school in meeting the special needs population and plan early in the process to ensure that those needs are being met through the design.

## 5.0 OPERATIONS AND MAINTENANCE

### 5.1 Mechanical and Electrical

- Mechanical and Electrical systems to be designed to code requirements
- Systems to be coordinated with HWDSB Facilities Management Department
- Energy efficiency and ease of maintenance to be prioritized
- Meet ANSI standard for Emergency Eyewash and Shower Equipment

### 5.2 Information Technology

- HWDSB Standard Control Panel to be located in all Instructional and Staff Areas. Refer to Appendix for Typical Control Panel.
- HWDSB Standard Teaching Wall to be incorporated in all typical Instructional spaces. Refer to Appendix for Typical Teaching Wall.
- Consult with HWDSB IIT Department to incorporate current technology standards

### 5.3 Security and Access Control

- Consult with HWDSB Facilities Operations Division to incorporate current security requirements.

## Program Sheets - Table of Contents

<b>1.0 Instructional Spaces</b>	30
<b>1.1 Classroom</b>	30
<b>1.2 Science Laboratories</b>	32
1.2.1 General Science Classroom	32
1.2.2 Large Shared Science Lab - multi-purpose Chemistry and Biology	35
1.2.3 Science Lab Biology	39
1.2.4 Science Lab Chemistry	42
1.2.5 Science Lab Physics	45
1.2.6 Science Prep Room	48
<b>1.3 Music/Arts</b>	51
1.3.1 Music Instrumental/Vocal	52
1.3.2 Visual Arts – Multi-Purpose Studio	54
1.3.3 Visual Arts – Sculpture Studio	57
1.3.4 Digital Media Arts	60
1.3.5 Theatre Arts	62
<b>1.4 Technical/Vocational</b>	64
1.4.1 Business/Computer Room	64
<b>1.5 Family Studies</b>	66
1.5.1 Family Studies (Food & Nutrition)	66
1.5.2 Family Studies (Textiles/Fashion)	69
<b>1.6 Technology Labs - Large</b>	71
1.6.1 Hospitality/Tourism	71
1.6.2 Integrated Technology	74
1.6.3 Transportation Technology	77
1.6.4 Construction Technology	80
1.6.5 Manufacturing Technology	83
1.6.6 Technological Design	87
1.6.7 Green Industries – Horticulture Greenhouse	89

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

---

- Electrical  
(continued):
- Classroom control panel:
    - PA system, speaker, thermostat, light switches, clock, power & data outlets
  - Fire alarm signalling device to be provided in accordance with ULC code requirements
  - Power requirements for tablet charging station to be coordinated with HWDSB and manufacturer
- 

- Notes:
- General classrooms required on all floors
  - All walls to be available as teaching wall surfaces

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

1.2.1

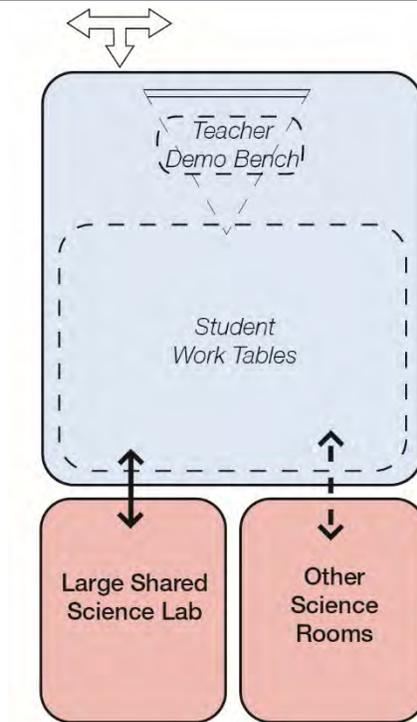

Program Area:	<b>Science Laboratories</b>		
Room Name:	<b>General Science Classroom</b>	Capacity:	24 to 30
		Area (sf):	850 min.
		Area (SM):	79
<hr/>			
Program Activities:	<ul style="list-style-type: none"> <li>• Large group, small group &amp; individual instruction</li> <li>• Individual &amp; group work</li> <li>• Data collection and analysis</li> <li>• Demonstrations</li> <li>• Project work</li> </ul>		
<hr/>			
Spatial Relationships:	<ul style="list-style-type: none"> <li>• Near other science classrooms &amp; large shared labs</li> <li>• Adjacent to science labs</li> <li>• Near to science prep room</li> <li>• Proximity to large group washrooms</li> </ul>		
<hr/>			
Environmental Considerations:	<ul style="list-style-type: none"> <li>• Recommended: daylighting design with glazing area determined by the design solution.</li> <li>• STC rating (walls): 40</li> <li>• Individual thermostat control (+/-3°C)</li> <li>• Chemical resistant counter tops and sinks</li> </ul>		
<hr/>			
Finishes:

Program Activities:	<ul style="list-style-type: none"> <li>• Animation, illustration, graphic design, photography, Photoshop, video &amp; film, sound recording &amp; mixing</li> <li>• Individual &amp; group work</li> <li>• Digital photography, working in a studio with backdrop and soft box photography</li> <li>• Scanning drawings and printing</li> </ul>		
<hr/>			
Spatial Relationships:	<ul style="list-style-type: none"> <li>• Adjacent to other art classrooms</li> <li>• Near Communications Tech - can share resources such as video equipment, edit suites, green screens, sound editing</li> <li>• Close to technology labs and drama</li> </ul>		
<hr/>			
Environmental Considerations:	<ul style="list-style-type: none"> <li>• STC rating (walls): min. 60</li> <li>• Individual thermostat control (+/-3°C)</li> </ul>		
<hr/>			
Finishes:			
Floor:	• Resilient tile	Base:	• Resilient
Walls:	• Concrete masonry units (painted)	Ceiling:	• Suspended acoustical
<hr/>			
Furnishings & Equipment:			
Furniture:	<ul style="list-style-type: none"> <li>• Media storage/docking centre – locked area for charging tablets, digital cameras, video cameras</li> <li>• Student work tables (moveable)</li> <li>• Student computer tables – 24 computers</li> <li>• Student chairs w/castors</li> <li>• Teacher computer support</li> </ul>	Fixed Equipment:	<ul style="list-style-type: none"> <li>• Teacher coat &amp; book storage cabinet</li> <li>• Classroom control panel</li> <li>• Black-out window coverings at all exterior windows</li> <li>• +/-3 White board@ 2400mm x 1200mm</li> <li>• +/-2 Tack boards @ 1900mm x 1200mm</li> <li>• Teaching wall as per HWDSB Standard, refer to Appendix A.3</li> </ul>
Plumbing:	• None required	HVAC:	<ul style="list-style-type: none"> <li>• Standard ventilation</li> <li>• Air conditioning/heating</li> <li>• Independent temperature control</li> </ul>
Electrical:	<ul style="list-style-type: none"> <li>• 30 15A-1P duplex wall/furniture receptacles at computer stations (exact number for receptacles to be coordinated with HWDSB and number of student computers in space)</li> <li>• 8 15A-1P duplex wall mounted perimeter receptacles for general/student use</li> <li>• 2 15A-1P duplex wall/furniture mounted receptacle at each teacher/demo station</li> <li>• Additional power requirements for specialty equipment (such as standard/3D</li> </ul>	Technology:	<ul style="list-style-type: none"> <li>• Data outlets for projectors</li> <li>• 1 data outlet at classroom control panel for general use</li> <li>• 1 data outlet at computer/student station</li> <li>• 2 data outlet at teaching/demo station w/conduit to ceiling</li> <li>• Data outlets to accompany wall/furniture receptacles for student computers (exact number of data outlets to be coordinated with HWDSB and number of student computers in space)</li> </ul>

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

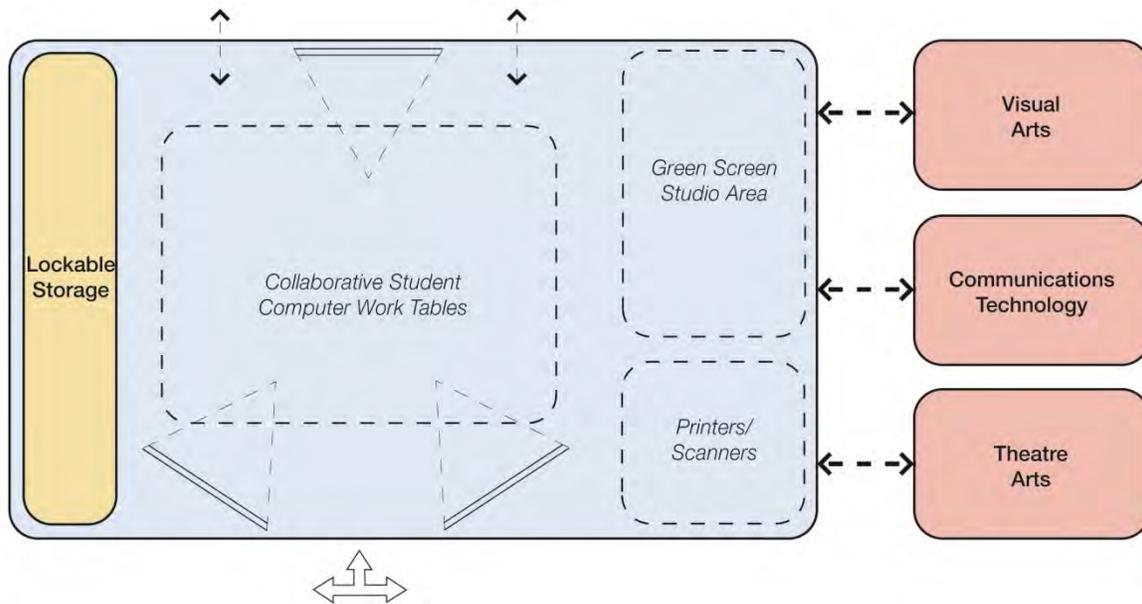

Electrical (continued): printers, digital media centre, etc.) To be coordinated with HWDSB and to be in accordance with CSA code requirements

- Fire alarm signalling device to be provided in accordance with ULC code requirements
- Additional 15A-1P duplex receptacle (1) to be provided at each of the following: projector, and classroom control panel where applicable and locations mandated by CSA code requirements
- LED lighting w/multi-level switching
- Classroom control panel:
  - PA system, speaker, thermostat, light switches, clock, power & data outlets

Technology (continued):

- 1 data outlet at wireless access point (WAP)

- Notes:
- Need a digital work area – well spaced work areas
  - Need a digital media centre with printers and scanners
  - Need secure storage for equipment
  - No perimeter computers

This diagram represents one of many possible arrangements for furnishings & equipment:

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

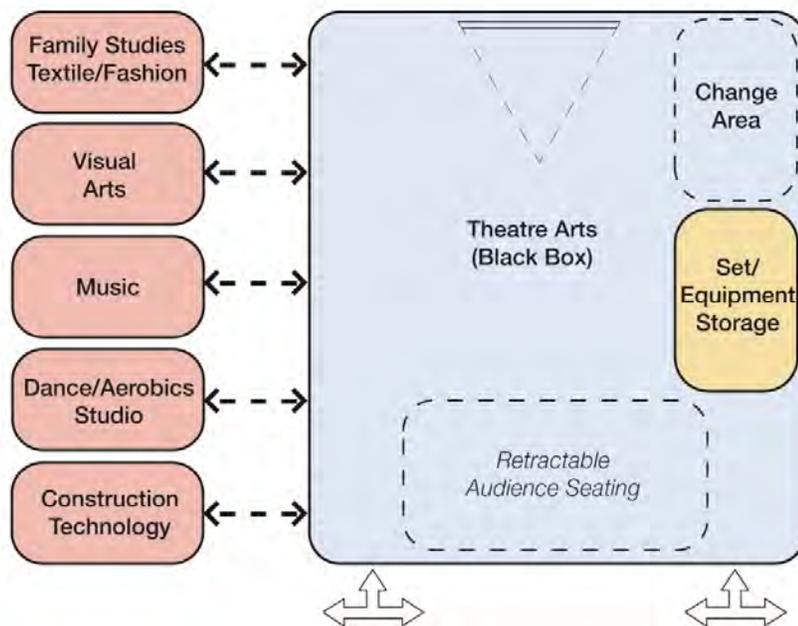

1.3.5

Program Area:	<b>Music/Arts</b>		
Room Name:	<b>Theatre Arts</b> (Theatre Arts & Stage program areas may be combined for a Black Box theatre)	Capacity:	24 to 30
		Area (sf):	750
		Area (SM):	74
Program Activities:	<ul style="list-style-type: none"> <li>• Create, present, study and reflect on theatre</li> <li>• Large group, small group &amp; individual instruction</li> <li>• Acting (rehearsals-vocal work and characterizations)</li> <li>• Presentations &amp; demonstrations</li> <li>• Production – presentations/technical theatre</li> </ul>		
Spatial Relationships:	<ul style="list-style-type: none"> <li>• Near fashion arts and visual arts (design and craft)</li> <li>• Near technology labs (set design and construction)</li> <li>• Near family studies (costume design and manufacturing)</li> <li>• Near computers (light/sound/projection design and execution)</li> <li>• Near music (composition, scoring and production)</li> <li>• Near dance (choreography and movement)</li> </ul>		
Environmental Considerations:	<ul style="list-style-type: none"> <li>• STC rating (walls): 60</li> <li>• Individual thermostat control (+/-3°C)</li> </ul>		
Finishes:			
Floor:	<ul style="list-style-type: none"> <li>• Sprung wood floor with Harlequin type dance surface</li> </ul>	Base:	<ul style="list-style-type: none"> <li>• Resilient</li> </ul>
Walls:	<ul style="list-style-type: none"> <li>• Concrete masonry units (painted black)</li> <li>• Acoustical treatment on walls</li> </ul>	Ceiling:	<ul style="list-style-type: none"> <li>• High suspended acoustical or exposed</li> </ul>
Furnishings & Equipment:			
Furniture:	<ul style="list-style-type: none"> <li>• Props</li> <li>• Sets</li> <li>• Collapsible and movable tables and chairs</li> <li>• Flip-forms</li> <li>• Movable seating for audience</li> </ul>	Fixed Equipment:	<ul style="list-style-type: none"> <li>• Full length mirror on one wall</li> <li>• Dressing area with curtain divider</li> <li>• 1 White board</li> <li>• 1 Tack board</li> <li>• Stage drapes</li> <li>•</li> </ul>
Plumbing:	<ul style="list-style-type: none"> <li>• Sink at back stage area</li> </ul>	HVAC:	<ul style="list-style-type: none"> <li>• Standard ventilation</li> <li>• Air conditioning/heating</li> <li>• Independent temperature control</li> <li>• Acoustically lined ductwork</li> </ul>
Electrical:	<ul style="list-style-type: none"> <li>• 8 duplex wall mounted perimeter receptacles for general/student use</li> <li>• 1 15A-1P duplex wall/furniture mounted receptacle at each computer station</li> <li>• 2 15A-1P duplex wall/furniture mounted receptacle at each teacher/demo station</li> <li>• Theatre type central sound system compete with amplification, recording, playback and microphone interfacing capabilities, electrical requirements to be</li> </ul>	Technology:	<ul style="list-style-type: none"> <li>• 1 data outlet for projector</li> <li>• 1 data outlet at classroom control panel</li> <li>• 1 data outlet at computer/student station</li> <li>• 2 data outlet at teaching/demo station w/conduit to ceiling</li> <li>• 1 data outlet at wireless access point (WAP)</li> </ul>

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

- Electrical (continued):
- coordinated with HWDSB and theatre sound system manufacturer
  - Fire alarm signalling device to be provided in this space and in each associated space (i.e. changing room, etc.) In accordance with ULC code requirements
  - Additional 15A-1P duplex receptacle (1) to be provided at each of the following: projector, and classroom control panel where applicable and locations mandated by CSA code requirements
  - Additional power requirements for motorized stage curtain, etc. To be coordinated with HWDSB and in accordance with CSA code requirements
  - LED lighting w/multi-level switching
  - Suspended stage lighting system, electrical requirements to be coordinated with HWDSB and stage lighting manufacturer and in accordance with CSA code requirements
  - Classroom control panel:
    - PA system, speaker, thermostat, light switches, clock, power & data outlets

- Notes:
- Rooms to be designed as a black box theatre
  - Allow for large storage space to store props, costumes and other equipment
  - Provide a separate area for changing
  - Curtains and drapes to meet CAN/ULC for flame spread rating

This diagram represents one of many possible arrangements for furnishings & equipment:

Program Activities:	<ul style="list-style-type: none"> <li>• Students will develop technical knowledge and skills in testing, servicing and engine repair including electrical, suspension, brake and steering systems on vehicles, aircraft and/or watercraft</li> <li>• Students will develop an awareness of environmental and societal issues related to transportation</li> <li>• Large group, small group &amp; individual instruction</li> <li>• Individual &amp; group work</li> <li>• Presentations &amp; demonstrations</li> <li>• Inspect vehicles, develop estimates and perform repairs in an auto shop setting</li> <li>• Welding</li> </ul>		
<hr/>			
Spatial Relationships:	<ul style="list-style-type: none"> <li>• Near other technology classrooms and labs</li> <li>• Welding and machinery</li> <li>• Computer design</li> <li>• Next to technological design</li> <li>• Transportation instructional space to be adjacent to the trans shop</li> <li>• Exterior secured storage of vehicles</li> </ul>		
<hr/>			
Environmental Considerations:	<ul style="list-style-type: none"> <li>• Exterior windows required w/minimum 2 operable vents per room-preferably clerestory</li> <li>• STC rating (walls): min. 60</li> <li>• Individual thermostat control (+/-3°C)</li> <li>• Vehicular access with secure exterior storage (semi-sheltered)</li> <li>• Waste oil drums and oxygen bottles</li> </ul>		
<hr/>			
Finishes:			
Floor:	• Epoxy flooring or sealed concrete	Base:	• Integral cove base
Walls:	• Concrete masonry units (painted)	Ceiling:	• Exposed and painted
<hr/>			
Furnishings & Equipment:			
Furniture:	<ul style="list-style-type: none"> <li>• 2 large stainless steel work benches</li> <li>• Service desk with 5 computers</li> <li>• Shelving for research materials</li> <li>• Instructional area – standard classroom</li> <li>• Student chairs w/castors</li> <li>• Teacher workstation &amp; chair w/castors</li> </ul>	Fixed Equipment:	<ul style="list-style-type: none"> <li>• White boards +/- @ 2400mm x 1200mm</li> <li>• Tack boards +/- @ 1800mm x 1200mm</li> <li>• Teacher coat &amp; book storage cabinet</li> <li>• Open bookshelves</li> <li>• Classroom control panel</li> <li>• 2 car hoists</li> <li>• Enough space for 4 cars</li> <li>• Tools include: basic hand tools, hoists, scan tools, lathes, tire machine, balancer, drill press, grinder, work benches, bench vises.</li> <li>• Chemical storage cabinet</li> <li>• One (1) Chop Saw (metal)</li> <li>• One (1) drill press</li> </ul>

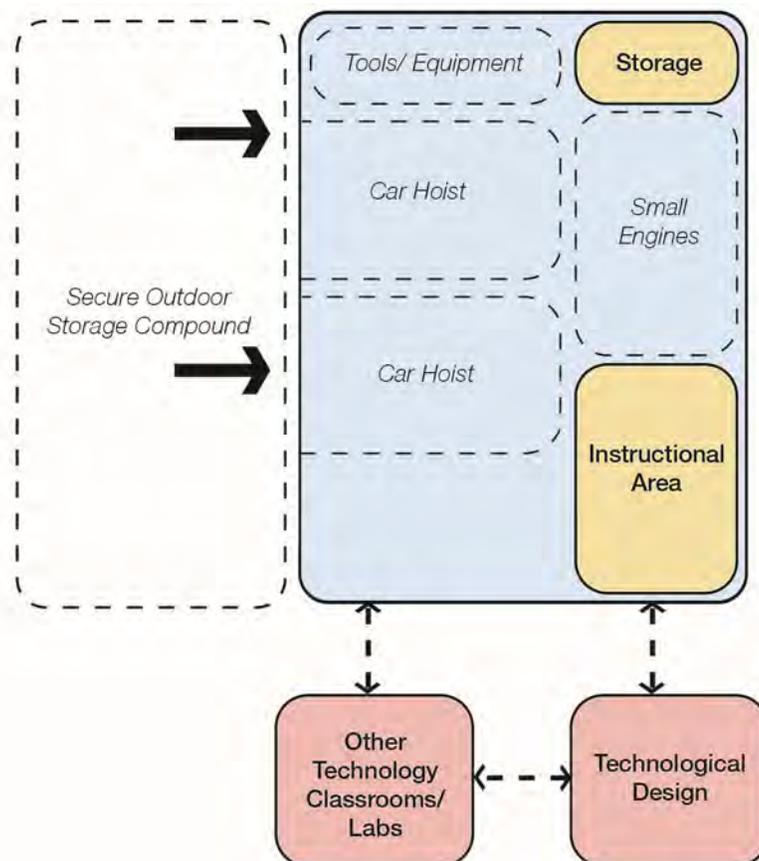

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

	Fixed Equipment (continued):	<ul style="list-style-type: none"> <li>• One (1) Grinder</li> <li>• One (1) tire balancer</li> <li>• One (1) tire changer</li> </ul>
Plumbing:	<ul style="list-style-type: none"> <li>• Washfountain type hand wash sinks</li> <li>• Hose bibs</li> <li>• Trench drain</li> <li>• Eye wash station</li> <li>• Compressed air</li> <li>• Hot/cold water connections</li> <li>• Sanitary connections</li> <li>• Floor drains</li> <li>• Oil interceptor</li> </ul>	HVAC: <ul style="list-style-type: none"> <li>• Make up air/dedicated exhaust</li> <li>• Dedicated make up air/exhaust for spray booth</li> <li>• Standard ventilation</li> <li>• Heating only (no AC)</li> <li>• Independent temperature control</li> <li>• Local ventilation for tail pipes as per Ontario Ministry of Labour Engineering Data Sheet</li> </ul>
Electrical:	<ul style="list-style-type: none"> <li>• Dedicated panel(s) complete with splitter and disconnect to service Transportation Technology shop related loads only – equipped with emergency push button operated contactor kill switch at room entrance and teacher/demo station, complete with hallway mounted indicating dome light</li> <li>• 1 15A-1P duplex wall/furniture mounted receptacle at each computer station</li> <li>• 2 15A-1P duplex wall/furniture mounted receptacle at each teacher/demo station</li> <li>• 10 15A-1P duplex wall mounted receptacles for general/student use</li> <li>• Additional 15A-1P duplex receptacle (1) to be provided at each of the following: projector, and classroom control panel where applicable and locations mandated by CSA code requirements</li> <li>• Fire alarm signalling device to be provided in accordance with ULC code requirements</li> <li>• Overhead door power requirements and control locations to be coordinated with HWDSB and door manufacturer where applicable</li> <li>• Powered car lift electrical requirements and control locations to be coordinated with HWDSB and door manufacturer where applicable</li> <li>• 4 20A-1P ceiling receptacles, pull down type coil cords complete with kellems grips, for flexibility and mobility</li> <li>• Power requirements for larger tools (i.e. Welder, lathe, saw, grinder, drill etc.) To be coordinated with HWDSB and tool manufacturer and in accordance with CSA code requirements – dedicated circuits to be used where necessary</li> </ul>	Technology: <ul style="list-style-type: none"> <li>• 1 data outlet for projector where applicable</li> <li>• 1 data outlet at classroom control panel for general use</li> <li>• 1 data outlet at interactive boards/monitor where applicable</li> <li>• 2 data outlet at teaching/demo station w/conduit to ceiling</li> <li>• 1 data outlet at wireless access point (WAP)</li> <li>• 1 data/television outlet at television location where applicable</li> <li>• 1 data outlet to accompany wall/furniture receptacle at each computer station</li> </ul>

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

- Electrical (continued):
- Power requirements for spray booth to be coordinated with HWDSB and manufacturer and in accordance with CSA code requirements
  - LED lighting w/multi-level switching
  - Classroom control panel:
    - PA system, speaker, thermostat, light switches, clock, power & data outlets

- Notes:
- Ground floor location
  - Oversized overhead doors
  - Spray booth – for auto body work
  - Lockable storage area (interior and exterior)
  - Specialized equipment and space requirements for Transportation Technology (SHSM) to be confirmed by HWDSB

This diagram represents one of many possible arrangements for furnishings & equipment

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

1.6.4

Program Area:	<b>Technology Labs - Large</b>		
Room Name:	<b>Construction Technology Construction – Building Careers (SHSM)</b>	Capacity:	22
		Area (sf):	2500
		Area (SM):	232
<hr/>			
Program Activities:	<ul style="list-style-type: none"> <li>• Develop technical knowledge and skills related to carpentry, masonry, electrical systems, heating and cooling and plumbing for residential construction.</li> <li>• Students gain hands on experience using a variety of materials, processes, tools and equipment to design, layout and build projects</li> <li>• Students will learn how to create and read technical drawings, learn construction terminology, interpret building codes and regulations and apply mathematical skills in developing construction projects.</li> <li>• Work on small to large wood working projects.</li> <li>• Build scale models of walls including electrical and plumbing.</li> <li>• Large group, small group &amp; individual instruction</li> <li>• Individual &amp; group work</li> </ul>		
<hr/>			
Spatial Relationships:	<ul style="list-style-type: none"> <li>• Near other technology classrooms and labs</li> <li>• Near computer labs for AutoCAD program</li> <li>• Near drama classroom</li> </ul>		
<hr/>			
Environmental Considerations:	<ul style="list-style-type: none"> <li>• Exterior windows required w/minimum 2 operable vents per room-clerestory windows</li> <li>• STC rating (walls): 40</li> <li>• Individual thermostat control (+/-3°C)</li> </ul>		
<hr/>			
Finishes:			
Floor:	• Epoxy flooring or sealed concrete	Base:	• Integral cove base
Walls:	• Concrete masonry units (painted)	Ceiling:	• Exposed and painted
<hr/>			
Furnishings & Equipment:			
Furniture:	• 6 workbenches with 4 stools each	Fixed Equipment:	<ul style="list-style-type: none"> <li>• White boards +/-2 @ 2400mm x 1200mm</li> <li>• Tack boards +/-2 @ 1800mm x 1200mm</li> <li>• Teacher coat &amp; book storage cabinet</li> <li>• Classroom control panel</li> <li>• Storage space for various wood supplies and lumber</li> <li>• Storage for equipment/tools – radial arm saw, jointer, planer, table saw, miter saw, drill press, mortise machines, panel saw, lathes, edge sander, spindle sander, and variety of power and hand tools.</li> <li>• Table top work benches, display cases to showcase work.</li> <li>• Two (2) Band Saw (metal or wood)</li> <li>• One (1) CNC Mill/Router</li> <li>• Three (3) drill press</li> <li>• 1 (one) dust extractor</li> </ul>

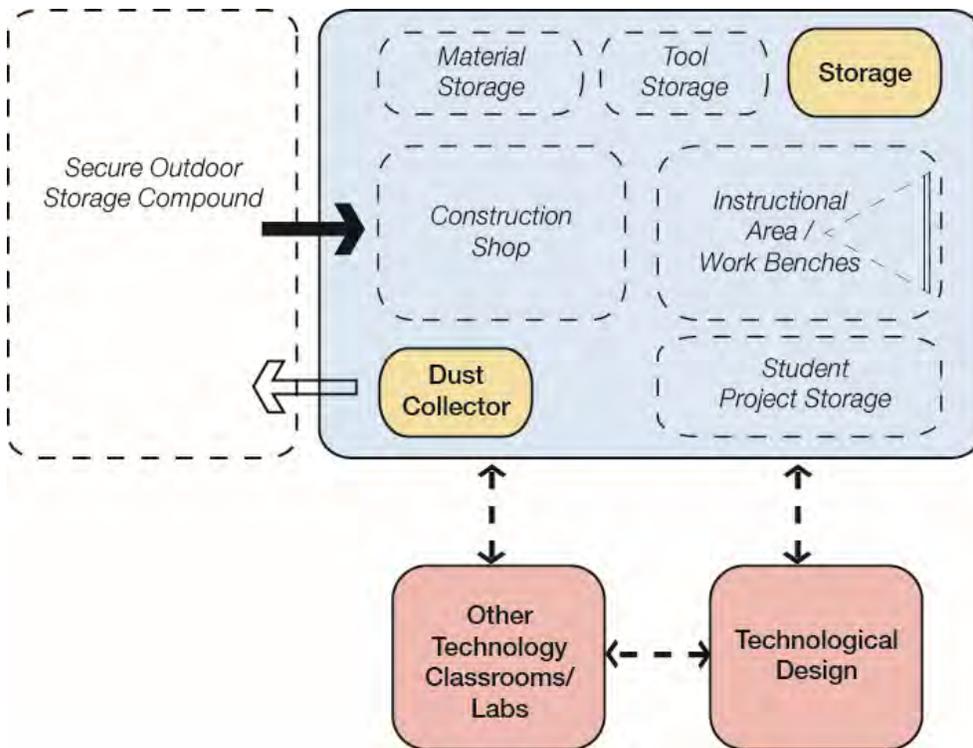

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

	Fixed Equipment (continued):	<ul style="list-style-type: none"> <li>• Two (2) jointer</li> <li>• Two (2) mitre saw</li> <li>• One (1) Mortiser</li> <li>• One (1) panel saw</li> <li>• One (1) planer</li> <li>• One (1) router table</li> <li>• One (1) sander (belt)</li> <li>• One (1) sander (belt/disc combo)</li> <li>• One (1) sander (disk)</li> <li>• One (1) sander (edge)</li> <li>• One (1) sander (spindle)</li> <li>• One (1) scroll saw</li> <li>• Two (2) table saw</li> <li>• Two (2) wood lathe</li> </ul>	
Plumbing:	<ul style="list-style-type: none"> <li>• Washfountain hand wash sinks</li> <li>• Hose bibs</li> <li>• Trench drain</li> <li>• Eyewash station</li> <li>• Hot/cold water connections</li> <li>• Sanitary connections</li> <li>• Floor drains</li> </ul>	HVAC:	<ul style="list-style-type: none"> <li>• Standard ventilation</li> <li>• Heating only (no AC)</li> <li>• Independent temperature control</li> <li>• 1200 cubic foot dust collector (or sized to meet equipment load)</li> </ul>
Electrical:	<ul style="list-style-type: none"> <li>• 2 dedicated panels (600V and 120/208V) complete with splitter and disconnects to service Construction Technology shop related loads only – equipped with emergency push button operated contactor kill switch at room entrance and teacher/demo station, complete with hallway mounted indicating dome light</li> <li>• 1 15A-1P duplex wall/furniture mounted receptacle at each computer station</li> <li>• 2 15A-1P duplex wall/furniture mounted receptacle at each teacher/demo station</li> <li>• 10 15A-1P duplex wall mounted receptacles for general/student use</li> <li>• Additional 15A-1P duplex receptacle (1) to be provided at each of the following: projector, and classroom control panel where applicable and locations mandated by CSA code requirements</li> <li>• Fire alarm signalling device to be provided in accordance with ULC code requirements</li> <li>• Overhead door power requirements and control locations to be coordinated with HWDSB and door manufacturer where applicable</li> <li>• 4 20A-1P ceiling receptacles, pull down type coil cords complete with kellems grips, for flexibility and mobility – dedicated circuits</li> </ul>	Technology:	<ul style="list-style-type: none"> <li>• 1 data for projector where applicable</li> <li>• 1 data outlet at classroom control panel</li> <li>• 2 data outlet at teaching/demo station</li> <li>• 1 data outlet at wireless access point (WAP)</li> <li>• 1 data/television outlet at television location where applicable</li> <li>• 1 data outlet to accompany wall/furniture receptacle at each computer station</li> </ul>

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

- Electrical (continued):
- Power requirements for larger tools (i.e. Welder, lathe, saw, grinder, drill, CNC mill etc.) To be coordinated with HWDSB and tool manufacturer and in accordance with CSA code requirements – dedicated circuits to be used where necessary
  - Classroom control panel:
    - PA system, speaker, thermostat, light switches, clock, power & data outlets

- Notes:
- Ground floor location
  - Oversized overhead doors
  - Space for built projects
  - Need large floor space to build models and for the construction of walls (complete with wiring, drywall, trim, paint, etc.)
  - Secure exterior storage space
  - Need an area designated for finishing projects, lockable storage area, material racking, benches, CNC routers complete with computers
  - Specialized equipment and space requirements for Construction – Building Careers (SHSM) to be confirmed by HWDSB

This diagram represents one of many possible arrangements for furnishings & equipment:

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

1.6.5

Program Area:	<b>Technology Labs - Large</b>			
Room Name:	<b>Manufacturing Technology Manufacturing (SHSM)</b>	Capacity:	22	Area (sf): 2500 Area (SM): 232

Program Activities:

- Hands on, project based learning
- Students develop design, fabrication and problem solving skills while using tools and equipment such as lathes, mills, welders, computer-aided machines, robots and control systems
- Large group, small group & individual instruction
- Individual & group work
- Presentations & demonstrations
- Machining, welding, fabrication (rolling, tube-bending), sheet metal, pneumatics, hydraulics, Mastercam (toolpath software), AutoCAD, CNC plasma, CNC router, Grinding, Drilling, Oxy-Acetylene Torches
- Machining on metal lathe.
- Measuring and laying out material for specific projects
- Welding different joints and positions in Arc, Mig and Tig welding
- Mastercam (toolpath software) to draw and create a toolpath for a CNC machine
- Pneumatics – to read a schematic and connect the necessary components on a board by using air.
- Hydraulics – to read a schematic and connect the necessary components on a board using oil
- Welding different joints and positions (flat, horizontal, vertical)
- Read and interpret engineering drawings in 2D and 3D along with pneumatic and hydraulic schematics
- To design and build a project using AutoCAD and Mastercam

Spatial Relationships:

- Near other technology programs, transportation, construction tech., exploring tech.
- Computer lab attached to manufacturing shop
- Near Physics
- Ground floor location

Environmental Considerations:

- Exterior windows required w/minimum 2 operable vents per room
- STC rating (walls): min. 60
- Individual thermostat control (+/-3°C)

Finishes:

Floor:	<ul style="list-style-type: none"> <li>• Epoxy flooring</li> <li>• Sealed concrete</li> </ul>	Base:	<ul style="list-style-type: none"> <li>• None</li> </ul>
Walls:	<ul style="list-style-type: none"> <li>• Concrete masonry units (painted)</li> </ul>	Ceiling:	<ul style="list-style-type: none"> <li>• Exposed (painted)</li> </ul>

Furnishings & Equipment:

Furniture:	<ul style="list-style-type: none"> <li>• Large non-combustible student work tables-standing height</li> <li>• Standing height stools</li> </ul>	Fixed Equipment:	<ul style="list-style-type: none"> <li>• White boards +/- @ 2400mm x 1200mm</li> <li>• Tack boards +/- @ 1800mm x 1200mm</li> <li>• Teacher coat &amp; book storage cabinet</li> <li>• Welding booths tools: wrenches and sockets, pliers, vise-grips, cutting tools for lathes and milling machines, grinding</li> </ul>
------------	---	------------------	---

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

	<p>Fixed Equipment (continued):</p>	<p>discs, welding tips, welding nozzles, plasma tips, CNC router bits, milling machine vises, hole saws, oxygen tanks, acetylene tanks, argosheild tanks, argon tanks, regulators, arc welding electrodes, welding gloves and helmets, pneumatic tubing.</p> <ul style="list-style-type: none"> <li>• Equipment: metal lathes, milling machines, bench grinders, hand grinders, mig welders, arc and tig welders, drill press, shear, brake press, pneumatic boards, hydraulic board, blacksmith forge, CNC plasma, CNC router, tube bender, sheet metal and bar roller, vertical and horizontal saws and laptops. 3D printers.</li> <li>• Flammables storage cabinet</li> <li>• Oxy-Acetylene torches – cutting material</li> <li>• Bench grinding or hand grinding</li> <li>• Machining on a metal lathe, milling machine and drill press.</li> <li>• 2-4 welding booths (may be shared with Manufacturing)</li> <li>• One (1) Band saw (horz)</li> <li>• Two (2) band saw (metal or wood)</li> <li>• One (1) Chop saw (metal)</li> <li>• One (1) CNC lathe</li> <li>• One (1) Cutting Shear</li> <li>• Four (4) Drill press</li> <li>• One (1) Grinder</li> <li>• One (1) hydraulic press (manual)</li> <li>• One (1) iron worker</li> <li>• Eight (8) metal lathe</li> <li>• One (1) Milling machine (horizontal)</li> <li>• One (1) milling machine (vertical)</li> <li>• One (1) surface grinder</li> </ul>
<p>Plumbing:</p> <ul style="list-style-type: none"> <li>• Washfountain type hand wash sink</li> <li>• Eyewash station</li> <li>• Hot/cold water connections</li> <li>• Sanitary connections</li> <li>• Floor drain</li> <li>• Compressed air</li> </ul>	<p>HVAC:</p>	<ul style="list-style-type: none"> <li>• Heating only (no AC)</li> <li>• Independent temperature control</li> <li>• Specialized venting system</li> <li>• Make up air/dedicated exhaust</li> <li>• Welding booth fume extraction to meet ACGIH Industrial Ventilation requirements</li> </ul>
<p>Electrical:</p> <ul style="list-style-type: none"> <li>• 2 dedicated panels (600V and 120/208V) complete with splitter and disconnects to service Manufacturing Technology shop related loads only – equipped with emergency push button operated contactor kill switch at room entrance and teacher/demo station, complete with hallway mounted indicating dome light</li> <li>• 1 15A-1P duplex wall/furniture mounted receptacle at each computer station</li> </ul>	<p>Technology:</p>	<ul style="list-style-type: none"> <li>• 1 data outlet for projector</li> <li>• 1 data outlet at classroom control panel</li> <li>• 2 data outlet at teaching/demo station w/conduit to ceiling</li> <li>• 1 data outlet at wireless access point (WAP)</li> <li>• 1 data outlet to accompany wall/furniture receptacle at each computer/workbench station</li> </ul>

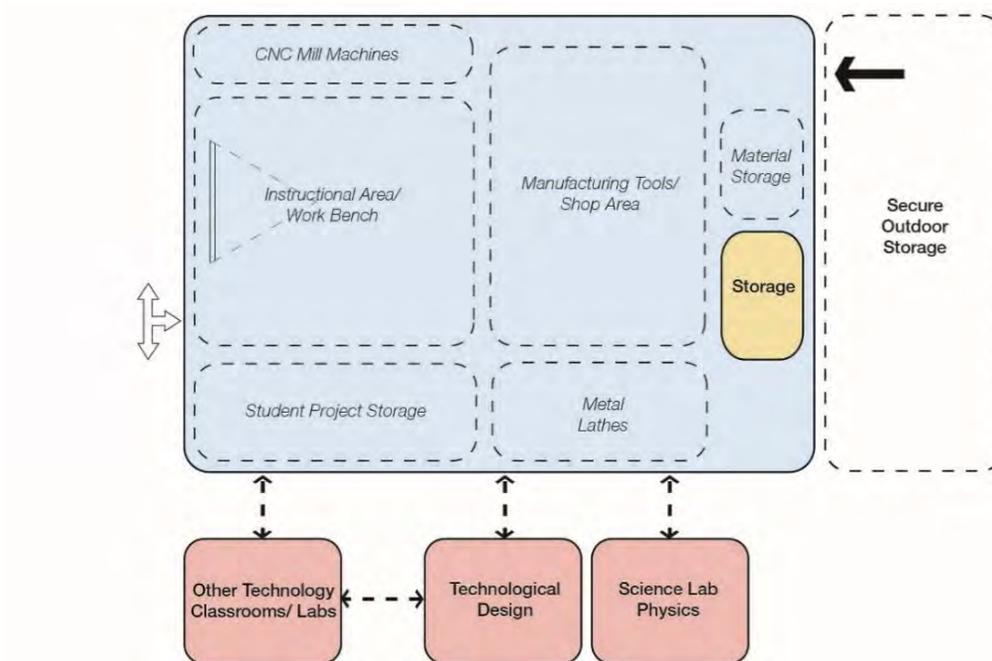

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

---

- Electrical  
(continued):
- 2 15A-1P duplex wall/furniture mounted receptacle at each teacher/demo station
  - 10 15A-1P duplex wall mounted receptacles for general/student use
  - 3 20A-1P duplex receptacles mounted at each student/workbench station and teacher/demo station to provide power to smaller power tools – 1 circuit per workbench station in anticipation of heavy load
  - Additional 15A-1P duplex receptacle (1) to be provided at each of the following: projector, and classroom control panel where applicable and locations mandated by CSA code requirements
  - Fire alarm signalling device to be provided in accordance with ULC code requirements
  - Power requirements for larger tools (i.e. Welder, lathe, saw, grinder, drill, CNC mill etc.) To be coordinated with HWDSB and tool manufacturer and in accordance with CSA code requirements – dedicated circuits to be used where necessary
  - LED lighting w/multi-level switching
  - Classroom control panel:
    - PA system, speaker, thermostat, light switches, clock, power & data outlets

- 
- Notes:
- Classroom on the ground floor
  - Need space for storage of steel
  - Need space for repairs on equipment
  - Need lockable cupboards
  - Specialized equipment and space requirements for Manufacturing (SHSM) to be confirmed by HWDSB

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

This diagram represents one of many possible arrangements for furnishings & equipment

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

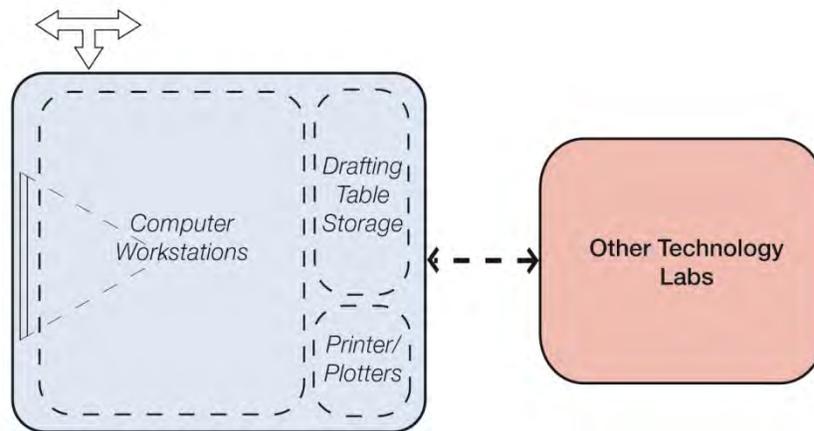

1.6.6

Program Area:	<b>Technology Labs - Large</b>		
Room Name:	<b>Technological Design</b>	Capacity:	22
		Area (sf):	900
		Area (SM):	83
<hr/>			
Program Activities:	<ul style="list-style-type: none"> <li>• Program looks at how technological design is influenced by human, environmental, financial and material requirements and resources.</li> <li>• Students research, design, build and assess solutions that meet specific human needs, using working drawings and other communication methods to present their ideas.</li> <li>• Students develop and awareness of environmental, societal and cultural issues related to technological design.</li> <li>• Multi-purpose shop to work on small design projects.</li> <li>• Large group, small group &amp; individual instruction</li> <li>• Individual &amp; group work</li> </ul>		
<hr/>

Furniture:	<ul style="list-style-type: none"> <li>• Computer tables and chairs with castors</li> <li>• Drafting tables (movable)</li> </ul>	Fixed Equipment:	<ul style="list-style-type: none"> <li>• Teacher coat &amp; book storage cabinet</li> <li>• Classroom control panel</li> <li>• White boards +/-2 @ 2400mm x 1200mm</li> <li>• Tack boards +/-2 @ 1800mm x 1200mm</li> </ul>
Plumbing:	<ul style="list-style-type: none"> <li>• None</li> </ul>	HVAC:	<ul style="list-style-type: none"> <li>• Standard ventilation</li> <li>• Air conditioning/heating</li> <li>• Independent temperature control</li> </ul>
Electrical:	<ul style="list-style-type: none"> <li>• 8 15A-1P duplex wall mounted perimeter receptacles for general/student use</li> <li>• Additional 15A-1P duplex receptacle (1) to be provided at each of the following: projector, and classroom control panel where applicable and locations mandated by CSA code requirements</li> <li>• Fire alarm signalling device to be provided in accordance with ULC code requirements</li> <li>• 1 15A-1P duplex wall/furniture mounted receptacles at each computer station</li> </ul>	Technology:	<ul style="list-style-type: none"> <li>• 1 data outlet for projector where applicable</li> <li>• 1 data outlet at classroom control panel</li> <li>• 2 data outlet at teaching/demo station</li> <li>• 1 data outlet at wireless access point (WAP)</li> <li>• 1 data outlet to accompany wall/furniture receptacle at each computer station</li> </ul>

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

- Electrical (continued):
- 2 15A-1P duplex wall/furniture mounted receptacle at each teacher/demo station
  - LED lighting w/multi-level switching
  - Classroom control panel:
    - PA system, speaker, thermostat, light switches, clock, power & data outlets

- Notes:
- Storage for portable drafting tables
  - Need access to plotters, 3D printers, 24 computers, model making area, drill press and small band saw

This diagram represents one of many possible arrangements for furnishings & equipment

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

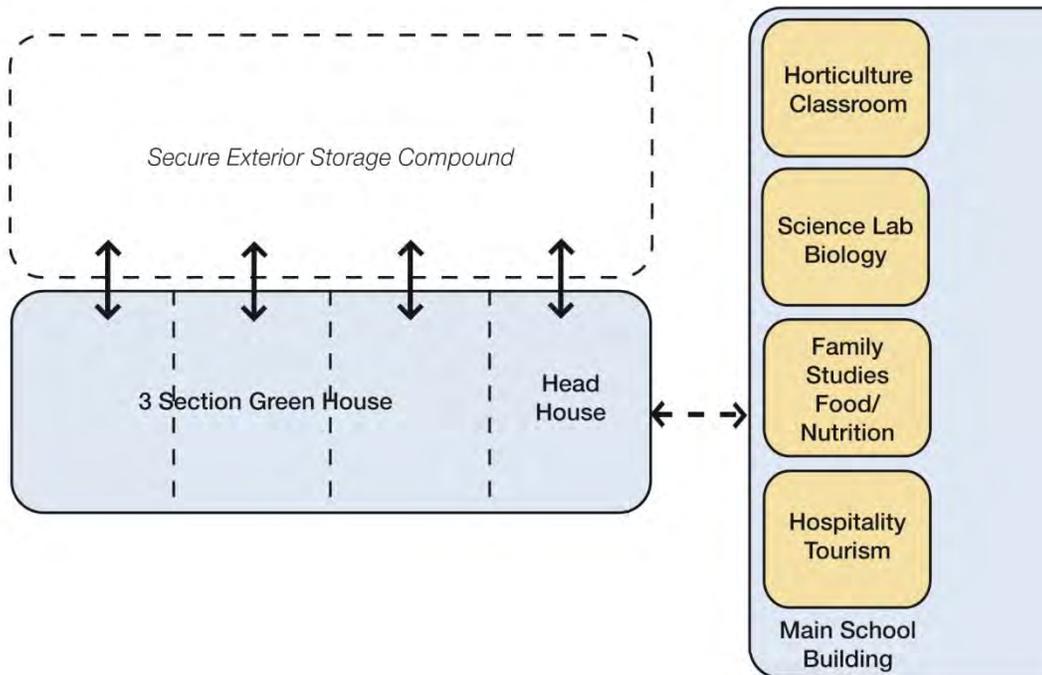

1.6.7

Program Area:	<b>Technology Labs - Large</b>		
Room Name:	<b>Green Industries – Horticulture Classroom, Greenhouse, Horticulture (SHSM)</b>	Capacity:	22
		Area (sf):	750
		Area (SM):	74
<hr/>			
Program Activities:	<ul style="list-style-type: none"> <li>• Large group, small group &amp; individual instruction</li> <li>• Individual &amp; group work</li> <li>• Presentations &amp; demonstrations</li> <li>• Horticulture skills development such as planting and pruning within a greenhouse setting</li> <li>• In class lectures – included plant identification, soils, environmental science, safety and workplace legislation in a standard classroom</li> <li>• Out of Class – practical grounds maintenance, plant science labs, aqua phonic growing, pruning, landscape construction</li> </ul>		
<hr/>			
Spatial Relationships:	<ul style="list-style-type: none"> <li>• Near Math, science</li> <li>• Need access to a multi-purpose room</li> <li>• Instructional space – can be shared with other programs – need access to computers</li> </ul>		
<hr/>			
Environmental Considerations:	<ul style="list-style-type: none"> <li>• Lots of exterior windows required w/minimum 2 operable vents per room</li> <li>• STC rating (walls): 40</li> <li>• Individual thermostat control (+/-3°C)</li> </ul>		
<hr/>			
Finishes:			
Floor:	• Sealed concrete	Base:	• n/a
Walls:	• Concrete masonry units (painted)	Ceiling:	• n/a
<hr/>			
Furnishings & Equipment:			
Furniture:	<ul style="list-style-type: none"> <li>• Student work tables</li> <li>• Student stools</li> <li>• Green house: Need 3 greenhouses (30x50) connected. 1 space to be heated and connected to the school.</li> <li>• Potting area with benches</li> </ul>	Fixed Equipment:	<ul style="list-style-type: none"> <li>• Storage cabinet with sink and uppers</li> </ul>
Plumbing:	<ul style="list-style-type: none"> <li>• Large stainless steel sink</li> <li>• Hose bibs</li> <li>• Cold water connections</li> <li>• Sanitary connections</li> <li>• Floor drains</li> <li>• Solids interceptor</li> </ul>	HVAC:	<ul style="list-style-type: none"> <li>• Standard ventilation</li> <li>• Air conditioning/heating</li> <li>• Independent temperature control</li> </ul>
Electrical:	<ul style="list-style-type: none"> <li>• 8 15A-1P duplex wall mounted receptacles in teaching area for general/student use</li> <li>• 2 15A-1P duplex wall/furniture mounted receptacle at each teacher/demo station</li> <li>• Additional 15A-1P duplex receptacle (1) to be provided at each of the following (in teaching area): projector, and classroom</li> </ul>	Technology:	<ul style="list-style-type: none"> <li>• 1 data outlet for projector</li> <li>• 1 data outlet at classroom control panel</li> <li>• 2 data outlet at teaching/demo station w/conduit to ceiling</li> <li>• 1 data outlet at wireless access point (WAP)</li> </ul>

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

<p>Electrical (continued):</p> <ul style="list-style-type: none"> <li>control panel where applicable and locations mandated by CSA code requirements</li> <li>• Fire alarm signalling device to be provided in accordance with ULC code requirements</li> <li>• GFCI protected receptacles to be provided within greenhouse locations (6 15A-1P GFCI receptacles per greenhouse) and in wet/splash areas in accordance with CSA code requirements</li> <li>• LED lighting w/multi-level switching</li> <li>• Classroom control panel: (in teaching area)             <ul style="list-style-type: none"> <li>◦ PA system, speaker, thermostat, light switches, clock, power &amp; data outlets</li> </ul> </li> </ul>	<p>Technology (continued):</p> <ul style="list-style-type: none"> <li>• 1 data/television outlet at television location where applicable</li> <li>• 1 data outlet to accompany wall/furniture receptacle at each computer station</li> </ul>
--	--

- Notes:
- Ground floor location – need to be adjacent to a green house
  - Need fenced in area in the spring to sell plants (usually near the parking area)
  - Head House – a place where the plant material will be stored
  - Specialized equipment and space requirements for Horticulture (SHSM) to be confirmed by HWDSB

This diagram represents one of many possible arrangements for furnishings & equipment

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

1.7.1

Program Area:	<b>Technology Lab - Small</b>		
Room Name:	<b>Communications Technology Information/Communication Technology (SHSM)</b>	Capacity:	22
		Area (sf):	1500
		Area (SM):	140
<hr/>			
Program Activities:	<ul style="list-style-type: none"> <li>• Program explores communications technology from a media perspective.</li> <li>• Design and produce media projects in the areas of live, recorded and graphic communications</li> <li>• Areas include TV, video and movie production, radio and audio production, print and graphic communications, photography, digital imaging, broadcast journalism and interactive new media</li> <li>• Large group, small group &amp; individual instruction</li> <li>• Individual &amp; group work</li> <li>• Presentations &amp; demonstrations</li> <li>• Build on various sectors such as communication systems, computer systems, software and digital media</li> <li>• Design, use and manage electronic, live, recorded and graphic communication systems</li> </ul>		
<hr/>			
Spatial Relationships:	<ul style="list-style-type: none"> <li>• Near other core classrooms</li> <li>• Near staff work rooms</li> <li>• Adjacent to collaborative learning hub</li> <li>• Adjacent to media arts to share digital resources</li> </ul>		
<hr/>			
Environmental Considerations:	<ul style="list-style-type: none"> <li>• Exterior windows required w/minimum 2 operable vents per room</li> <li>• STC rating (walls): 40</li> <li>• Individual thermostat control (+/-3°C)</li> </ul>		
<hr/>			
Finishes:			
Floor:	• Resilient tile	Base:	• Resilient
Walls:	• Concrete masonry units (painted)	Ceiling:	• High ceiling required for light grid
<hr/>			
Furnishings & Equipment:			
Furniture:	<ul style="list-style-type: none"> <li>• Student work tables (moveable)</li> <li>• Student chairs w/castors</li> <li>• Teacher workstation &amp; chair w/castors</li> <li>• Large layout tables with stools</li> <li>• Computer room set up for 24 students</li> </ul>	Fixed Equipment:	<ul style="list-style-type: none"> <li>• White boards +/-5 @ 2400mm x 1200mm</li> <li>• Tack boards +/-2 @ 1800mm x 1200mm</li> <li>• Teacher coat &amp; book storage cabinet</li> <li>• Open bookshelves</li> <li>• Classroom control panel</li> <li>• Window coverings and black-out shades at all exterior windows</li> <li>• Storage for video equipment</li> <li>• Green screen set up in the room</li> <li>• Sound edit room and control booth</li> </ul>
Plumbing:	• None required	HVAC:	<ul style="list-style-type: none"> <li>• Standard ventilation</li> <li>• Air conditioning/heating</li> <li>• Independent temperature control</li> </ul>

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

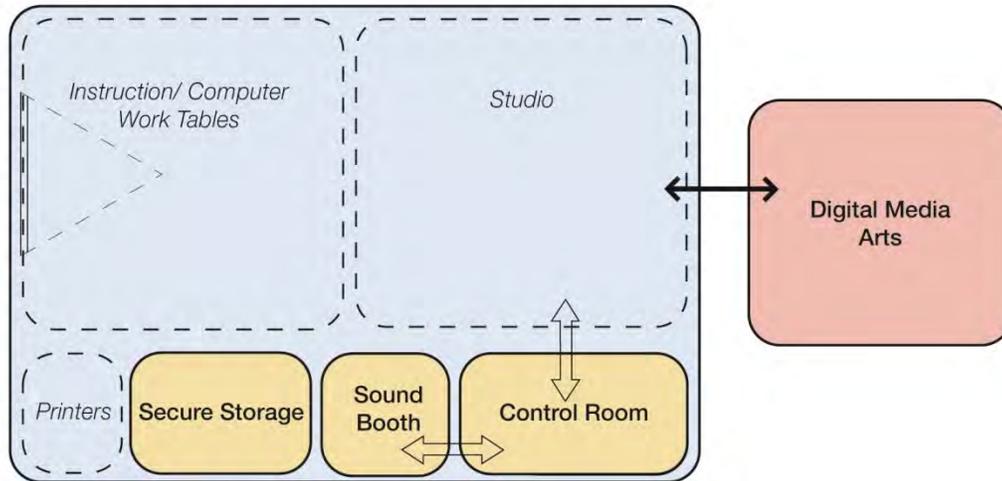

---

Electrical:	<ul style="list-style-type: none"><li>• 10 15A-1P duplex wall mounted perimeter receptacles for general/student use</li><li>• Additional 15A-1P duplex receptacle (1) to be provided at each of the following: projector, television and classroom control panel where applicable and locations mandated by CSA code requirements</li><li>• Fire alarm signalling device to be provided in accordance with ULC code requirements</li><li>• 1 15A-1P duplex wall/furniture mounted receptacle at each computer/student station</li><li>• 2 15A-1P duplex wall/furniture mounted receptacle at each teacher/demo station</li><li>• Power requirements/connections within specialty spaces (i.e. Video editing, sound editing, control booth, etc.) To be coordinated with HWDSB, equipment requirements and manufacturer</li><li>• Dedicated receptacle to be provided at digital printer to be coordinated with HWDSB, equipment requirements and manufacturer</li><li>• LED lighting w/multi-level switching</li><li>• Pipe grid supporting LED track lighting system</li><li>• Classroom control panel:<ul style="list-style-type: none"><li>◦ PA system, speaker, thermostat, light switches, clock, power &amp; data outlets</li></ul></li></ul>	Technology:	<ul style="list-style-type: none"><li>• 1 data for projector where applicable</li><li>• 1 data outlet at classroom control panel for general use</li><li>• 2 data outlet at teaching/demo station w/conduit to ceiling</li><li>• 10 data outlets to accompany wall receptacles for student use</li><li>• 1 data outlet at wireless access point (WAP)</li><li>• 1 data outlet to accompany wall/furniture receptacle at each computer/student station</li><li>• Data outlets/connections within specialty spaces (i.e. Video editing, sound editing, control booth, etc.) To be coordinated with HWDSB, equipment requirements and manufacturer</li></ul>

<p>Electrical:</p> <ul style="list-style-type: none"> <li>• 10 15A-1P duplex wall mounted perimeter receptacles for general/student use</li> <li>• Additional 15A-1P duplex receptacle (1) to be provided at each of the following: projector, interactive boards/monitor, television and classroom control panel where applicable and locations mandated by CSA code requirements</li> <li>• Dedicated 15A-1P duplex receptacle at each kitchen demo station coordinated with kitchen furniture to service microwave to be coordinated with kitchen furniture and HWDSB where applicable</li> <li>• Dedicated 40A-2P 240V stove receptacle</li> <li>• Dedicated GFI 15A-1P duplex wall mounted receptacle at over kitchen counter</li> <li>• Dedicated 15A-1P duplex wall mounted receptacle at each fridge/freezer location</li> <li>• Dedicated 30A-2P 240V receptacle to service clothes dryer</li> <li>• Dedicated 20A-1P duplex wall mounted receptacle to service clothes washer</li> <li>• Fire alarm signalling device to be provided in accordance with ULC code requirements</li> <li>• 2 15A-1P GFCI protected receptacles to be provided in Orthopaedic washroom above counter and in areas deemed to be wet and/or a splash zone in accordance with CSA code requirements</li> <li>• Additional power requirements for lift in Orthopaedic washroom to be coordinated with HWDSB and manufacturer</li> <li>• Comprehensive classrooms within Special Education Area to comply with Classroom room data sheet</li> <li>• 1 15A-1P duplex wall/furniture receptacle at each computer station</li> <li>• 2 15A-1P duplex wall/furniture receptacle at each teacher/demo station</li> <li>• LED lighting w/multi-level switching</li> <li>• Classroom sound amplification system</li> <li>• Classroom control panel: <ul style="list-style-type: none"> <li>◦ PA system, speaker, thermostat, light switches, clock, power &amp; data outlets</li> </ul> </li> </ul>	<p>Technology:</p> <ul style="list-style-type: none"> <li>• 1 data outlet for projector where applicable</li> <li>• 1 data outlet at classroom control panel for general use</li> <li>• 1 data outlet at interactive boards/monitor where applicable</li> <li>• 2 data outlet at teaching/demo station w/conduit to ceiling</li> <li>• 1 data outlet at wireless access point (WAP)</li> <li>• 1 data/television outlet at television location where applicable</li> <li>• 1 data outlet to accompany wall/furniture receptacle at each computer/student station</li> </ul>
<p>Notes:</p> <ul style="list-style-type: none"> <li>• Sensory room equipment- Sensory manipulatives, toys, exercise balls, stereo, couch, floor mats, weight blanket.</li> <li>• Orthopaedic washroom – ceiling-mounted lift, change table, storage cubbies for student supplies, shower (accessible off the corridor for the rest of the school to use)</li> </ul>	

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

- Notes (continued):
- Comprehensive classes – 12 students, to be next to resource room and guidance – typical classroom set up with a sink –to be bigger classroom size to accommodate flexible learning styles. Include a bank of computers.
  - Window sill height to allow view to exterior from wheelchair

This diagram represents one of many possible arrangements for furnishings & equipment

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

1.8.2

Program Area:	<b>Special Education/Resource Room</b>		
Room Name:	<b>Resource Area – Unloaded</b> (Student Success program)	Capacity:	Area (sf): Less than Area (SM): 400 sf
Program Activities:	<ul style="list-style-type: none"> <li>• Individual instruction and work</li> <li>• Meetings with students and parents, community agencies and teachers</li> <li>• Includes working with administration, teachers, community agencies, students and their guardians</li> <li>• Students access this space for a quiet room to do work</li> </ul>		
Spatial Relationships:	<ul style="list-style-type: none"> <li>• Close to student service teams – Guidance and other resource spaces</li> <li>• All program areas</li> <li>• Need space for outside agencies – Mohawk College, social workers, etc.</li> <li>• Adjacent to Learning commons</li> <li>• To be distributed throughout the school</li> <li>• Ground floor preferred</li> <li>• Proximity to student washrooms</li> </ul>		
Environmental Considerations:	<ul style="list-style-type: none"> <li>• Exterior windows required w/minimum 2 operable vents per room</li> <li>• STC rating (walls): 40</li> <li>• Individual thermostat control (+/-3°C)</li> <li>• To be the “hub” of the school that offers essential services to students and their families</li> </ul>		
Finishes:			
Floor:	• Resilient tile	Base:	• Resilient
Walls:	• Concrete masonry units (painted)	Ceiling:	• Suspended acoustical
Furnishings & Equipment:			
Furniture:	<ul style="list-style-type: none"> <li>• Student work tables (round moveable)</li> <li>• Student chairs w/castors</li> <li>• Individual student desks</li> <li>• Movable dividers to create individual workspaces</li> </ul>	Fixed Equipment:	<ul style="list-style-type: none"> <li>• White boards +/-2 @ 2400mm x 1200mm</li> <li>• Tack boards +/-5 @ 1800mm x 1200mm</li> <li>• Teacher coat &amp; book storage cabinet</li> <li>• Open bookshelves</li> <li>• Classroom control panel</li> <li>• Window coverings at all exterior windows</li> </ul>
Plumbing:	• None required	HVAC:	<ul style="list-style-type: none"> <li>• Standard ventilation</li> <li>• Air conditioning/heating</li> <li>• Independent temperature control</li> </ul>
Electrical:	<ul style="list-style-type: none"> <li>• 6 15A-1P duplex wall mounted perimeter receptacles for general/student use</li> <li>• Additional 15A-1P duplex receptacle (1) to be provided at each of the following: projector, interactive boards/monitor and classroom control panel where applicable</li> </ul>	Technology:	<ul style="list-style-type: none"> <li>• 1 data outlet at classroom control panel for general use</li> <li>• 1 data outlet meeting room for general use</li> <li>• 1 data outlet at wireless access point (WAP)</li> </ul>

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

---

- Electrical (continued):
- and locations mandated by CSA code requirements
  - 2 15A-1P duplex wall mounted perimeter receptacles in each meeting room
  - LED lighting w/multi-level switching
  - Classroom control panel:
    - PA system, speaker, thermostat, light switches, clock, power & data outlets

- 
- Notes:
- Need small meeting rooms with glazing for visual monitoring
  - Small meeting room for teacher for counselling and private meetings
  - Conference space – remote from student traffic
  - Meetings rooms to be flexible to allow for different size spaces
-

- Notes:
- This program requires the use of other program spaces in the school or community which will facilitate the delivery of this program.
  - Specialized equipment and space requirements to be confirmed by HWDSB
-

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

1.10.5

Program Area:	<b>Tier 3 Program</b>		
Room Name:	<b>Aviation and Aerospace (SHSM)</b>	Capacity:	22
		Area (sf):	2500
		Area (SM):	232
<hr/>			
Program Activities:	<ul style="list-style-type: none"> <li>• Work with industry experts in the aerospace field</li> <li>• Use real components of their industry such as a flight simulator</li> <li>• Large group, small group &amp; individual instruction</li> <li>• Individual &amp; group work</li> <li>• Presentations &amp; demonstrations</li> </ul>		
<hr/>			
Spatial Relationships:	<ul style="list-style-type: none"> <li>• Can use the Transportation Technology space to carry out program activities. Space needs to be bigger to accommodate a flight simulator</li> <li>• Open floor area for small plane</li> </ul>		
<hr/>			
Environmental Considerations:	<ul style="list-style-type: none"> <li>• Exterior windows required w/minimum 2 operable vents per room</li> <li>• STC rating (walls): min. 60</li> <li>• Individual thermostat control (+/-3°C)</li> </ul>		
<hr/>			
Finishes:			
Floor:	<ul style="list-style-type: none"> <li>• Epoxy flooring or sealed concrete</li> </ul>	Base:	<ul style="list-style-type: none"> <li>• Integral cove base</li> </ul>
Walls:	<ul style="list-style-type: none"> <li>• Concrete masonry units (painted)</li> </ul>	Ceiling:	<ul style="list-style-type: none"> <li>• Exposed and painted</li> </ul>
<hr/>			
Furnishings & Equipment:			
Furniture:	<ul style="list-style-type: none"> <li>• Large non-combustible student work tables-standing height</li> <li>• Standing height stools</li> </ul>	Fixed Equipment:	<ul style="list-style-type: none"> <li>• White boards +/-2 @ 2400mm x 1200mm</li> <li>• Tack boards +/-2 @ 1800mm x 1200mm</li> <li>• Teaching wall as per HWDSB Standard, refer to Appendix A.3</li> <li>• Teacher coat &amp; book storage cabinet</li> <li>• Full height lockable storage cabinets</li> <li>• Work counter with lockable cupboards and uppers</li> <li>• Flight simulator</li> <li>• 2 wing rotators</li> <li>• One drill press</li> <li>• English wheel</li> <li>• Shrinker/stretcher machine</li> </ul>
Plumbing:	<ul style="list-style-type: none"> <li>• Washfountain type hand sink</li> <li>• Eyewash station</li> <li>• Hot/cold water connections</li> <li>• Sanitary connections</li> <li>• Floor drain</li> </ul>	HVAC:	<ul style="list-style-type: none"> <li>• Standard ventilation</li> <li>• Heating only (no AC)</li> <li>• Independent temperature control</li> </ul>
Electrical:	<ul style="list-style-type: none"> <li>• Dedicated panel (600V and 120/208V) complete with splitter and disconnects to service shop related loads only – equipped with emergency push button operated contactor kill switch at room entrance and teacher/demo station, complete with hallway mounted indicating dome light</li> </ul>	Technology:	<ul style="list-style-type: none"> <li>• 1 data outlet for projector</li> <li>• 1 data outlet at classroom control panel</li> <li>• 1 data outlet at wireless access point (WAP)</li> <li>• Additional date outlets as directed by HWDSB</li> <li>• Control wiring for the flight simulator</li> </ul>

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

---

- Electrical  
(continued):
- 2 15A-1P duplex wall/furniture mounted receptacle at each teacher/demo station
  - 10 15A-1P duplex wall mounted receptacles for general/student use
  - 3 20A-1P duplex receptacles mounted at each student/workbench station and teacher/demo station to provide power to smaller power tools – 1 circuit per workbench station in anticipation of heavy load
  - Additional 15A-1P duplex receptacle (1) to be provided at each of the following: projector, and classroom control panel where applicable and locations mandated by CSA code requirements
  - Fire alarm signalling device to be provided in accordance with ULC code requirements
  - Power requirements for tools and equipment to be coordinated with HWDSB and tool manufacturer and in accordance with CSA code requirements – dedicated circuits to be used where necessary
  - LED lighting w/multi-level switching
  - Classroom control panel:
    - PA system, speaker, thermostat, light switches, clock, power & data outlets
  - Electrical provisions for flight simulators including all necessary harmonic transformers, disconnects, and/or safeties, etc. where applicable to be coordinated with HWDSB and simulator manufacturer

- 
- Notes:
- Specialized equipment and space requirements to be confirmed by HWDSB

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

1.10.6

Program Area:	<b>Tier 3 Program</b>		
Room Name:	<b>Strings</b>	Capacity:	24 to 30
		Area (sf):	1200
		Area (SM):	111
<hr/>			
Program Activities:	<ul style="list-style-type: none"> <li>• Performing Arts program for the violin, cello, bass and viola</li> <li>• Large group, small group &amp; individual instruction</li> <li>• Individual &amp; group work</li> <li>• Presentations &amp; demonstrations</li> </ul>		
<hr/>			
Spatial Relationships:	<ul style="list-style-type: none"> <li>• Near music program spaces and practice rooms</li> <li>• Adjacent to collaborative learning hub</li> <li>• Proximity to student washrooms</li> <li>• Adjacent to a large storage room for stings instruments (space for 100-150 string instruments)</li> <li>• Practice rooms – 4 to 8 rooms to accommodate the strings and other music programs</li> </ul>		
<hr/>			
Environmental Considerations:	<ul style="list-style-type: none"> <li>• Exterior windows required w/minimum 2 operable vents per room</li> <li>• STC rating (walls): min. 60</li> <li>• Individual thermostat control (+/-3°C)</li> <li>• Requires humidity control for equipment</li> <li>• Shape of the room should not be square</li> <li>• Acoustical control treatment on walls and ceilings</li> <li>• Higher than normal space</li> </ul>

Furniture (continued):	<ul style="list-style-type: none"> <li>• Student chairs</li> <li>• Casual seating chairs</li> <li>• Study carrels</li> <li>• (3) desk height file cabinets</li> <li>• Computer workstations</li> <li>• Circulation desk task chair</li> <li>• Paperback book racks</li> <li>• Newspaper racks</li> <li>• Magazine display</li> <li>• Portable book shelves</li> <li>• Booth seating</li> </ul>	Fixed Equipment (continued):	<ul style="list-style-type: none"> <li>• Tack boards 1800mm x 1200mm in the group study areas</li> <li>• Teaching wall as per HWDSB Standard, refer to Appendix A.3</li> <li>• Library bookshelves</li> <li>• Projection screen</li> <li>• Technology support casework</li> <li>• Window coverings at all exterior windows</li> <li>• Allow for seating booths with data</li> <li>• Shelving around perimeter of the room</li> <li>• Whiteboard</li> <li>• Smartboard</li> <li>• Appletv</li> <li>• Projector</li> <li>• Laptop to access programs or iPad</li> </ul>
Plumbing:	<ul style="list-style-type: none"> <li>• Sink in the work area</li> <li>• Hot/cold water connection</li> <li>• Sanitary connection</li> </ul>	HVAC:	<ul style="list-style-type: none"> <li>• Standard ventilation</li> <li>• Air conditioning/heating</li> <li>• Independent temperature control</li> </ul>
Electrical:	<ul style="list-style-type: none"> <li>• Adjustable lighting</li> <li>• Power provisions for multiple (5-10) charging stations to recharge tablets (5-15 devices) to be coordinated with HWDSB and charger manufacturer</li> <li>• Power provisions to service a large tablet/laptop/device charging station (40-60 devices) at each central staff desk, to be coordinated with HWDSB and charger manufacturer</li> <li>• Additional 15A-1P duplex receptacle (1) to be provided at each of the following: projector, interactive boards/monitor, television and classroom control panel where applicable and locations mandated by CSA code requirements</li> <li>• 1 15A-1P duplex wall/furniture mounted receptacle at each quiet student study station</li> <li>• 1 15A-1P duplex wall mounted receptacle spaced every 15 linear feet throughout Learning Commons for general/housekeeping use</li> <li>• 8 15A-1P duplex wall/furniture mounted receptacles at each circulation desk</li> <li>• 2 15A-1P duplex wall/furniture mounted receptacles at each leaning commons' kiosk</li> <li>• 1 15A-1P dedicated duplex wall/furniture mounted receptacle at each printer station</li> </ul>	Technology:	<ul style="list-style-type: none"> <li>• 1 data outlet for each projector where applicable</li> <li>• 1 data outlet at each classroom control panel for general use</li> <li>• 1 data outlet at each interactive boards/monitor where applicable</li> <li>• 2 data outlet at each kiosk station where applicable</li> <li>• 8 data outlets to accompany wall receptacles at each circulation desk</li> <li>• 1 data/telephone outlet at each circulation desk</li> <li>• 1 data outlet at each wireless access point (WAP)</li> <li>• 1 data/television outlet at television location where applicable</li> <li>• 1 data/telephone outlet at each classroom control panel for telephone</li> <li>• 1 data outlet to accompany wall/furniture receptacle at each quiet student study station</li> <li>• 40 data outlets to accompany receptacles in floor boxes</li> <li>• 2 data outlets at each learning commons staff office and group study/collaboration room</li> <li>• 1 data/telephone outlet at each learning commons staff office</li> <li>• 1 data outlet at each tablet charging station for general use/communication</li> <li>• 1 data outlet at each printer station</li> </ul>

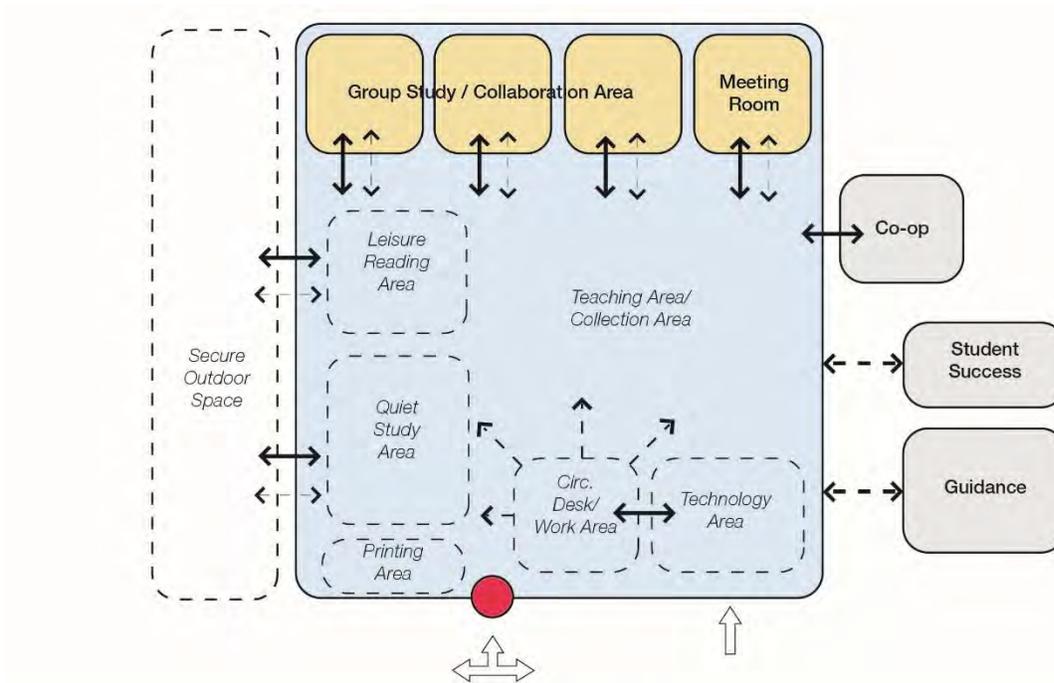

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

---

- Electrical  
(continued):
- 40 15A-1P duplex receptacles mounted in enclosed floor boxes evenly dispersed throughout usable Learning Commons' floor space (to include provisions for data outlet within same floor box)
  - Power provisions to service learning commons powered security gates
  - 4 15A-1P duplex wall mounted receptacles in each learning commons staff office and group study/collaboration room for general use
  - Power and control requirements for motorized blind/shades to be coordinated with HWDSB and manufacturer
  - Power and control requirements for motorized display screen to be coordinated with HWDSB and manufacturer
  - Fire alarm signalling device to be provided in accordance with ULC code requirements
  - LED lighting w/multi-level switching
  - Classroom sound amplification system
  - Power to charging walls/stations for school devices
  - Classroom control panel:
    - PA system, handset, speaker, thermostat, light switches, clock, power & data outlets

- 
- Notes:
- Circulation desks and library shelving can be loose furniture
  - Fixed casework and loose furnishings can be interchangeable
  - Lockable storage for IT equipment
  - Capability to divide the room into two with a divider – for possible seminar space, quiet work space and group work space. Rooms can be bookable by both students and teachers
  - Library control security gates
  - Area for displaying new and themed collections
  - Technology would be circulated from the circulation desk (i.e. Laptops, MacBook, iPad and chargers)
  - Separate printing area – including specialized printers
  - Quiet space for studying – min 2% of student population count
  - Technology Office area – work area for teacher librarian and library technician to share, include sink and cupboards for supplies – lockable and secure
  - Ground floor location is preferable, easy to locate and fully accessible
  - Group study/collaboration rooms with glazing

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

- Electrical (continued):
- Additional 15A-1P duplex receptacle (1) to be provided at each of the following: projector, interactive boards/monitor, television and classroom control panel where applicable and locations mandated by CSA code requirements
  - Fire alarm devices to be provided in accordance with ULC code requirements
  - Minimum two (2) ceiling mounted PA speakers complete with provisions to support full PA system head end
  - Minimum one (1) clock hanger receptacle
  - Call for Assistance System connected to emergency call switch in Barrier Free Washrooms.
  - LED lighting w/multi-level switching

- Technology (continued):
- 1 data/television outlet at television location where applicable
  - 1 data/telephone outlet at each desk/workstation and in each office for telephone
  - 2 data outlet to accompany wall/furniture receptacle at each staff desk/workstation/staff office

Notes:

This diagram represents one of many possible arrangements for furnishings & equipment:

## 6.0 FUNCTIONAL PROGRAM AREAS/ADJACENCY DIAGRAMS

---

Notes:

- Designed such that no rooms, doors, millwork or any other protrusion interferes with the required corridor width.
- Relationship with all public entrances and stair wells.
- Easily accessible to BF elevator and washrooms
- Minimum corridor width 3000mm
- Recessed sprinkler heads to prevent vandalism
- Where lockers are provided, provide masonry nib walls at each end
- Views to exterior - clear and simple circulation
- Allow for the provision of varying locker sizes
- Corridor and circulation spaces are used as collaborative spaces therefore, spaces of interaction and gathering to be considered
